The New Roof RAMROD IS A CHIPPER, SHREDDER, BAGGER, VACUUM, BLOWER.

ROOF RAMROD, with hopper, chips 3/4" diameter limbs with 3 h.p. engine, or 1" diameter limbs with 5 h.p. engine. And you feed the material in at the top where you're comfortable. The Roof Ramrod is an excellent composter. Two reversible cutting blades rotating at speeds up to 3600 r.p.m. grind, chip, chop and mix organic matter, reducing it to fine compost. Or use the grindings as a mulch.

ROOF RAMROD pulverizes glass, smashes tin cans, emasculates branches (up to 1" in diameter), masticates leaves, grass clippings, bagging them all. Dust-proof zippered flannel-lined canvas bag contains disposable plastic bag.

ROOF RAMROD serves as trail-vacuum, too. Picks up and bags grass clippings, leaves, cans, bottles, rocks, paper. Only a hitch (optional at extra cost) is necessary to enable you to pull it with your riding lawn mower or garden tractor. Or use the Roof Ramrod as a blower to windrow leaves, or to blow drives, sidewalks, patios clean. Sure you can use it as a snow blower in dry snow.

ROOF RAMROD, when equipped with blower baffle and nozzle, can easily be set to blow straight ahead or 90 degrees to left of operator. A 1/4" electric welded steel impeller moves maximum volume of air to windrow leaves, grass. Blows sidewalks and drives clean. Blows debris out from under trees, bushes, shrubs where you can get to it without cuts, bruises, scratches.

If you were going to design a lawn mower, where would you put the grass catcher?

On the right side so it bumps into whatever's sticking up on your right? On the left side so it does the same there?

The fact is, most grass bags are afterthoughts. They stick out to one side. They simply weren't designed to be a part of the mower.

The Snapper V21 or 18 has its grass bag between the handles. You can close trim on both sides

and vacuum your lawn of pine straw, leaves and light litter while you're mowing. We made the grass bag extra large, too. For less emptying. In fact, all the good things about Snapper V21 or 18 are logical. The result of sound design and planning by people who make lawn equipment and only lawn equipment. Not afterthoughts.
