National Farm Engineers Honor Dr. H. V. Walton

Dr. Harold V. Walton, a Lancaster native and former Christiana resident, has been named a Fellow of the American Society of Agricultural Engineers.

The honor, held by only 2 per cent of ASAE members, was presented Thursday during the society's 1973 annual meeting at the University of Kentucky in Lexington, Ky.

Walton was on the faculty of Penn State for a number of years before joining the agricultural engineering staff at the University of Missouri in 1962, later becoming head of the department. He held the position for seven years.

He then served as chief of party for a University of Missouri group working in Orissa, India,

Clashing Thimbles 4-H Club Meets

The third meeting of the Penn Manor 4-H Clashing Thimbles Club was held last week at the Millersville Middle School. Roll call was taken followed by the treasurers report.

Following group singing, a work period followed

under a USAID contract, before returning to the University of Missouri as professor of agricultural engineering in 1971.

Presently vice-chairman of the Food Engineering Division of the ASAE, Walton has served as national director, chairman of the Pennsylvania State Section and vice-chairman of the Mid-Central Region of the organization. The specialist in farm structures and environment received his bachelor's and master's degrees from Penn State and his doctorate in 1961 from Purdue University in Lafayette, Ind.

Sales Rising For Cheese, Lowfat Milk

We're drinking more glasses of lowfat milk and slipping thicker slices of cheese into our sandwiches.

An ERS tally shows these two products racked up the biggest sales gains at the dairy counter in 1972, with further increases in prospect this year.

On a per capita basis, cheese consumption advanced 9 percent last year to over 13 pounds.

— Sept. 1 Deadline For Angus Photo Contest

Photographers planning to enter the World of Aberdeen Angus Photo Contest can rest easy for the next few weeks as plans have been changed to accept entries up to September 1, 1973 rather than the previous deadline of July 1. The reason for the change was due to the late spring and summer and above average amount of rainfall in most parts of the United States making it difficult to acquire good photos of Angus cattle in an attractive surrounding.

As previously announced, the contest, a part of the World Angus Forum in Kansas City, Missouri October 1-2-3-4, is open to both amateur and professional photographers and a total of \$3,000 is being offered in the two major divisions. A subdivision in the amateur and professional competition allows for both colored and black and white prints to be entered.

Entries to the contest must reflect the broad theme "A World of Aberdeen Angus Cattle" and must include one or more or parts of an Angus in each photograph of transparency. Any number of entries will be accepted by each photographer but each photo or transparency must be previously unpublished in any magazine or

Lowfat and skim milk, also up 9 percent, reached 32 quarts per person.

Larger helpings of these items, along with increases in cottage cheese and ice cream, more than offset per capita declines in some other dairy foods.

The milk going into all dairy products in 1972 worked out to 563 pounds per person, or 5 pounds more than the year before

newspaper. Amateurs and professionals will not compete against each other and cash prizes will be awarded on the a panel of decision of professionals.

Further details and entry forms are available from the Public Relations Department of the American Angus Association, 3201 Frederick Blvd., St. Joseph. Missouri 64501.

HAVING VENTILATION PROBLEMS?

SEE US! WE OFFER THESE POPULAR MAKES

- **AEROVENT** ACME FAN JET SYSTEM
- **VENT-O-MATIC** - CHORE-TIME
- AIR-O-MATIC COOL AIR

A controlled environment is essential, particularly during the hot summer months. Controlled even temperatures in Poultry and Livestock housing can only be achieved with individually designed ventilating systems Let our engineers design a ventilating system to fit your needs. High volume air at low operating cost

Make More Milk... Make More Money

Beacon Golden Test Rations

C.A.F. — The Cow Acceptability Factor - determines how much grain your cows will eat. Beacon Golden Test milking rations are partially pelleted, contain a proven level of crimped corn for extra palatability. Even finicky eaters clean these feeds up well, responding with higher milk production than when fed less palatable feeds.

The Cow Acceptability Factor helps get more grain into your cows in critical periods of milk production. Call us today for Beacon Golden Test Rations with C.A.F.
