

OCT. 1-7, 1973

Forest rangers shudder, some woods are too dry.

Autumnal migration of birds at its peak now . . . Ford introduced Model "T" Oct. 1, 1908 . . . First quarter of the Moon Oct. 4 . . . Scallop season opens . . . Average length of days for week, 11 hours, 35 minutes . . . California gold rush began Oct. 6, 1848 . . . First World Series Boston-Pittsburgh 1903 . . . Yom Kippur Oct. 6 . . . First cotton prints made in Penn. 1810 . . . A warm heart requires a cool head.

Ask the Old Farmer: While in Maine this summer we noticed that many natives had smoked herring for breakfast two or three times a week. Do many New England coastal residents still like the old-fashioned breakfasts? J. F., Alexandria, Va.

They sure do. And not just up and down the coast. Besides smoked herring, many Yankees like breakfasts of codfish cakes and beans, warmed-over chowder and cornbread, and fried smelts and johnny cakes. A lot of apple pie disappears at breakfast too.

Home Hints: Use wet absorbent cotton to collect small fragments of glass . . . Linseed oil will remove tar from a car . . . Fresh eggs will sink in a bowl of cold water; bad ones will float.

OLD FARMER'S WEATHER FORECASTS

New England: Week begins partly cloudy and mild, then light rain; end of week clear and warm.

Greater New York-New Jersey: Clear all week; temperatures becoming hot as week progresses.

Middle Atlantic Coastal: First part of week mostly clear and warm; cloudy and very warm latter part.

Southeast Coastal-Piedmont: Early week showers along coast; most of week partly cloudy and hot.

Florida: Rain all week and very warm.

Upstate & Western New York-Toronto & Montreal: Week begins partly cloudy and cool, then showers at midweek; end of week cloudy and warmer.

Greater Ohio Valley: Clear all week; temperatures warm at first, becoming hot by weekend.

Deep South: Mostly clear and hot all week.

Chicago and Southern Great Lakes: Cloudy with scattered showers and very warm throughout week.

Northern Great Plains-Great Lakes: Clear and hot through midweek, then partly cloudy; rain latter part.

Central Great Plains: Clear all week; very warm temperatures becoming hot at end of week.

Texas-Oklahoma: Clear skies and hot temperatures throughout week.

Rocky Mountain Region: Mostly clear all week; temperatures cooling off towards end of week.

Southwest Desert: Cloudy and warm at first, then rain; latter part clear with highs in mid-90s.

Pacific Northwest: Cloudy and hot to start, then cooler at midweek; end of week clear and warm.

California: Week begins clear and hot, then overcast and cooler; end of week clear and warm.

Show of Force

The first around-the-world voyage by any American battle force was the voyage of the "great white fleet" of the U.S. Navy in 1907-1909. President Theodore Roosevelt had a dual plan - to give the fleet unique training and to show the world the power that had defeated Spain.

DUNCAN CORN CRIB

Rods Slide Quickly Into Place . . . Lock Panels Into Unbroken Cylinder Of Galvanized Mesh!

NOW, you can own a permanent, lifetime, all steel mesh corn crib for less than the cost of many temporary cribs . . . have all the strength and anti-rust characteristics the galvanized mesh can have. Using the interlocking joint panel connections you quickly hook together and lock with rods . . . creating an unbroken cylinder of 2 or 5-gauge steel mesh with the ability to stand pressures and strains far in excess of any which may be put upon it under normal use.

The simple "J-bolt" method of attaching the steep roof to the mesh uses the inherent strength of each to reinforce the other. A generous 6 inches of overhang has been provided for greater protection. Interlocking sheets of heavy gauge metal give the "Rod-Lok" Corn Crib roof strength

High pitch roof approx. 45 degree pitch 24 gauge roof panels.

to stand the highest wind and hold the heaviest snowfall. Top cap and half panel on roof removable for easy filling. Large slat door opening. Slat not furnished for door.

No time like the present
No time like **BAKER'S**
AG * LIMESTONE

. . . is the very best time to spread limestone. It then has all winter - through rain, snow, freezing and thawing - to seep to root depths. Lime needs time to unlock vital nutrients and sweeten the soil so the fertilizers you apply in the Spring will do all you expect them to. Give you bigger, healthier crops.

Baker's agricultural limestone is available in two types, high-magnesium or high-calcium. Both sweeten acid soil, raise pH and unlock vital plant nutrients. For fast, efficient delivery, call your dealer or Baker today.

	Calcium Oxide	Magnesium Oxide
Conestoga Valley balanced limestone from our Ephrata quarry	53.5%	5%
Prime lime dolomite limestone from our Gap quarry	30%	20%
Hy Mag limestone from our Paradise quarry	30%	20%
