

Paderewski, one of the world's greatest concert pianists, was the first premier of the Republic of Poland, and gave much of his fortune to aid that nation.

Introducing . . .

The Anderson Automatic MEDICATOR

FOR MEDICATION OF POULTRY AND LIVESTOCK DRINKING WATER OR ANY HIGH RATIO METERING APPLICATION REQUIRING TRUE PROPORTIONING

Model DP-194 with E-12 Expansion Tank and H-RF Kit.

SPECIFICATIONS

Water flow-1/3 to 10 GPM
 Feed Ratio Max.-1:96 (greater than 1:128 and the feed is fully adjustable)
 Water Pressure- 15 to 125 PSIG
 Pressure loss Small (3 PSIG at 10 GPM)
 Chemical Lift 5 ft.

► **Accurate**

This is a positive displacement, diaphragm pump-completely water operated and water controlled.

► **Reliable**

Used for over 10 years by the largest and most progressive plants in Government-Industry-Nurseries and private potable water systems. Sold throughout the free world.

► **Failsafe**

Water flow controls the pumping action. If there is no water flow there is no pumping action.

► **Trouble Free**

Built for many years service-of-heavy brass wall castings and stainless steel parts-No flimsy injection molded plastic parts that are delicate and easily broken.

Farmers Can Close Gap

A wide communications gap exists between food producers and urban consumers, and it is largely up to the farmers to close it.

So says Joseph P. Sullivan, president of Estech, Inc., who adds that both sectors are being hurt by the almost complete lack of communication. Estech, with major interests in chemicals, is a subholding company of Esmark, Inc., Chicago. Esmark has additional major interests in food, energy and varied financial services.

"While the situation is certainly not the farmers' fault, it is high time they quit complaining that their problems are not understood by urbanites - and time they began to communicate, to help get their story across. Those of us in business serving agriculture must also help.

"If the American people don't

understand the problems of, say, the auto industry or the airlines, it is up to those industries to tell their story. The same should be true for the producers of food," Sullivan observes.

He notes that the consumer needs to learn the facts about the food situation as badly as the farmer needs to explain them, because both groups have been hurt.

"The uncertainty of the market caused a great number of pregnant sows and cows to be slaughtered. Such unfortunate actions as this plus consumer demands for government action are rapidly taking us toward serious food shortages and definitive possibilities of even higher food prices," Sullivan declares.

It is important to encourage increased farm productivity, he says, to meet growing domestic food demands as well as helping to stabilize the dollar and offset balance of trade deficits.

"For government to truly assist in this, we must have an informed, understanding consumer," Sullivan concludes, "and this will require a concerted cooperative effort by all segments of the food-producing industry.

Consumers' Corner

Multipurpose Furniture

The smaller, more compact homes of today are calling for less furniture and for furniture that has multiple uses.

Among the multipurpose pieces that are gaining in popularity are the small chests in place of night tables, low chests in place of lamp tables, sleeping units with storage underneath, and a hutch on top of a buffet, instead of a separate china cabinet.

Chests, cabinets and cases with squared-off lines can be grouped side by side for more storage in less space or placed separately as needs change.

For flexible storage in relatively small spaces, modular wall systems should be considered. These units include wall-hung, pole-suspended, free standing or stacked systems of chests, cabinets, record and file cabinets, desk and bookshelf units. The units, all of the same width and depth, can be changed to be used in many combinations to meet various needs or to be easily moved to a new home. Wall systems offer expandability. One can start with a small section and add to it as finances permit.

Some Restaurant

The food is sensational! They serve only steaks that have been referred to the Air Force as UFOs - Unidentified Flying Objects

The LIGHTWEIGHT CHAMPION SURGE MINI-CUP

... EASY TO HANDLE, PLUS ALL THESE GOOD COW MILKING EXTRAS:
CAPACITY . . . to handle the milk from your highest producing cows and still maintain a stable vacuum level
VISIBILITY . . . lets you see the milk flow from each quarter
EFFICIENCY . . . electrically controlled, on-line or unit mounted pulsators regulate inflation action. They provide the right ratio for both milking speed and cow comfort

DURABILITY . . . quality materials and superior workmanship combine for trouble-free operation.
