

HARRISBURG MEMO . . .

To: *The People of Pennsylvania*

From: *Milton J. Shapp, Governor*

HARRISBURG --- Warning signals have been sounded for more than a year about the energy crunch and possible shortages of sources of energy such as gasoline and fuel oil used for heating.

I want all Pennsylvanians to know that we in state government intend to do everything possible to insure that no one is cold in his home, or place of business this winter.

As Governor, I intend to do everything I can to insure that hospitals, nursing homes and similar facilities are adequately fueled for heat.

Measures must be taken where necessary to provide for an allocation of fuel on an equitable basis for homes and businesses throughout the Commonwealth.

So that our people do not suffer this winter - we must act fast.

Officials in Washington have told us that with normal winter temperatures, the nation can expect a seven percent shortage of fuel oil.

Unfortunately, thus far Washington has refused to take any realistic steps to deal with the impending crisis.

We cannot wait for the predictable to overwhelm us. Regardless of Washington's inaction, as Governor I am taking steps to minimize the negative impact of the impending fuel crisis.

In order to monitor the energy crisis and its effect on our residents and businesses, by Executive Order I have appointed a Governor's Task Force on Energy with Charles G. Simpson of Philadelphia as Chairman.

Mr. Simpson, a former general manager of the Philadelphia Gas Works, is a concerned environmentalist and a highly dedicated public servant.

Not only is Mr. Simpson an expert in the field of energy and fuel supply, he has served for five years as a member of the

Philadelphia Air Pollution Control Board and is a founder and director of the Delaware Valley Council for Clean Air. He will report directly to me and make various recommendations concerning the energy situation.

The members of the Governor's Task Force on Energy will be: Walter Arader, secretary of Commerce; George Bloom, chairman of the Public Utility Commission; Maurice Goddard, secretary of Environmental Resources; Jacob Kassab, secretary of Transportation; A. Edward Simon, director, office of State Planning and Development, and William H. Wilcox, secretary of Community Affairs.

The task force will:

1. Review the energy needs of the people and industry according to each type of energy and fuel supply;
2. Maximize the use of Pennsylvania coal wherever possible in keeping with environmental regulations;
3. Recommend a program of energy conservation for both industry and individual residents;
4. Recommend priority needs;
5. Recommend any legislation or executive action which is necessary to see that residents and industries have adequate energy and fuel supplies in the future, or in event an adequate supply is not available, to recommend and supervise a fair rationing program.

I have asked every state department, agency and commission to give Mr. Simpson and the task force cooperation in providing data, personnel and any other assistance.

We also will select advisors from consumer, environment and industrial groups to give the task force valuable input.

It is clear that the efforts of this task force are essential, but their efforts will be hindered as long as the federal government buries its head in red tape in Washington, bows to the oil and gas industries

and refuses to adopt a national allocations program.

But we shall do our best even under these adverse circumstances to help Pennsylvania's citizens and industries.

Variations On A Hot Dog
 "Chihuahua" — a hot dog with chili sauce; "Poodle" — a hot dog smothered with onions; "Dutch Dog" — covered with sauerkraut and "New Englander" — split and topped with baked beans.
