Shapp to Address Grangers

Delegates to the 101st Pennsylvania State Convention in Reading October 22-25 will hear important messages agriculture from Governor Milton J. Shapp and Dr. Russell E. Larson, Pennsylvania State University provost.

October 23, State Grange Master

Governor Shapp will address several thousand delegates of the 58,000-member Grange at the Tuesday afternoon session, October 13 at the Rajah Theatre. He also will be a guest of honor and bring greetings to those attending the annual banquet at the Abraham Lincoln Hotel Tuesday evening.

Dr. Larson, former dean of the College of Agriculture at Penn State, will be the keynote speaker at the Tuesday evening banquet. Governor Shapp, an Ohio native, has gained a national reputation as a progressive, innovative industrialist and as a strong advocate of human rights. Following service in the U.S. Army during World War II, he pioneered the development of community antenna television and founded a multi-million dollar business employing more than 2,000 people. The new industry which he created, the community antenna television business, now serves more than 3,000 communities in the United States and employs 75,000 per-

A native of Minnesota, Dr. Larson has had wide experience in domestic and foreign agricultural programs. In addition to serving as dean of the College of Agriculture at Penn State, he served as director of the Agricultural Experiment Station

there from 1969 to 1972, and director of Agricultural and Home Economics Extension from 1971 to 1972. He was named provost at Penn State in July 1972.

Dr. Larson served as a scientific aide to the Mexican Agricultural Program of the Rockefeller Foundation in 1960; as a member of the committee on review of the University of Costa Rica in 1965, and as a member of research teams to Argentina in 1962, 1966 and again in 1968 From 1958 to 1962, he was a consultant of the Office of Experiment Stations of the U.S. Department of Agriculture

USDA Steps Up Mea, Poultry' 'ests in South

The residue testing program for meat and poultry going to slaughter in several southeastern states will be increased after a flock of broiler chickens from Monroe, N.C. was found to contain residues of the insecticide chlordane well above the working tolerance, it was announced by the U.S. Department of Agriculture (USDA).

USDA's Animal and Plant Health Inspection Service emphasized that the action was taken as a precautionary measure, and will be continued until the exact source of the chlordane is pinpointed.

The insecticide showed up in routine tests conducted by the processor just prior to slaughter. USDA was promptly notified of the findings. The affected chickens, produced by Central Soya, Inc. of Monroe, N.C., were destroyed.

The tests showed that the birds contained residues of three parts per million. The working tolerance for chlordane in meat and poultry is 0.3 p.p.m.

No residues were found in other Central Soya flocks. However, the company in cooperation with USDA, has launched an immediate investigation of the farms and feed mills to determine the source.

Altogether, Central Soya under USDA supervision is testing 42 flocks in the area representing chickens 90,000 turkeys prior to their being released for slaughter.

to the beat of a different drummer, as they call him a traveller.

DRAFT HORSES **AND**

This is the largest selection of draft horses and mules to be found anywhere.

If you are looking for horses or mules with quality and size we have them,
