

## State Taking Applications For Therapeutic Workers

Applications will be accepted until further notice for therapeutic activities workers in various state institutions, the State Civil Service Commission said today. Starting salaries range from \$9,174 to \$10,054 yearly.

Applications will be accepted continuously and Saturday examinations scheduled at statewide test centers as necessary. The examinations will also be given daily beginning April 30, at Commission office in

Harrisburg.

Applicants for therapeutic activities worker trainee and therapeutic activities worker I are asked to specify on their civil service application whether they wish to be included in the occupational therapy, recreational, or vocational adjustment specialization. Candidates should obtain copies of the examination announcement for details on specializations, position requirements, and acceptable combinations of

experience and training.

Those applying for therapeutic activities worker trainee and therapeutic activities worker I must have a bachelor's degree, including or supplemented by courses in an area of specialization. No previous experience is required for the trainee level; candidates for therapeutic activities worker I must have had one year of experience in therapeutic activities work.

Applications, examination announcements, and further information may be obtained from State Civil Service Commission office in Harrisburg, or from personnel offices of state schools and hospitals.

County Commissioner Paul Paes, right, congratulates Mr. and Mrs. John Yost on being named to receive the 1974 outstanding cooperator award from the Lancaster County Conservation District. Paes

presented the Yosts with a Grant Heilman aerial photograph of their farm at the District's annual meeting Thursday night at the Good 'N Plenty Restaurant.

#### Cat-Haters

Though millions of homes have cats as pets, there are people who can't stand the animals. Among famous cat haters of history were Alexander the Great, Louis XIV, and Napoleon - possibly because they couldn't tolerate anyone who wouldn't come when summoned.

#### For The Royal Family

In Inca days, use of coca - a pain killer and stimulant - was restricted mainly to the royal family. Today Bolivian highlanders chew it to relieve fatigue. Little work gets done without it.

#### Powerful Claw

An Alaska king crab's great claw can crunch halfway through a broomstick or break a finger.

## A Stitch in Time

Mending is still necessary with an iron and sewing hand, but much of it you can do machine rather than by

The iron-on patch saves time. You can do your ironing and mending at the same time. For more difficult jobs, use both the iron-on and machine methods.

For the combination method, iron on the patch first. Then reinforce with machine stitching—either zig-zag or straight stitching. The extra stitching keeps the patch on during repeated washings.

A stitch in time is still a good motto. When certain parts of garments begin to look thin or show signs of wear, reinforce them with iron-on tape or an extra layer of fabric on the inside.

You can buy extra parts to replace worn cuffs or worn out elastic or broken straps on lingerie. And an extra bit of lace, placed under lace on a slip which shows signs of wear, will prevent a tear. Also, using the zig-zag stitch prevents stitches from "popping" when repairing lingerie or fabrics with stretch or give.

When garments need mending, repair them to cut down on your family's clothing costs.
