

John S. Falconer New Chairman Of United Way

John S. Falconer of 1275 Meadowbrook Road, assistant to the president of Armstrong Cork Company, has been appointed general chairman of the 1974 United Way Campaign of Lancaster County. This announcement was made recently by Nelson F. Craig, United Way board president.

As general chairman of the campaign, Falconer will direct and coordinate the volunteer leadership of the

1974 campaign to renew and add financial support for 35 United Way service agencies. Falconer served as vice-chairman of the 1973 campaign which registered a gain of 5.3 percent over the amount raised in the prior year.

Active in the United Way since he came to Lancaster in 1965, Falconer has served in many campaign posts and as a member of the Budget Committee in 1965. Since

The U.S. Department of Agriculture has amended eight federal milk marketing orders to change the pricing of milk used in manufactured dairy products, after approval through their cooperative associations by more than the required number of dairy farmers in each market. The change will apply from April through July 1974.

The orders affected are the Boston Regional, Connecticut, New York-New Jersey, Middle Atlantic, Eastern Ohio-Western Pennsylvania, Ohio Valley, Southern Michigan, and Indiana.

then he has served on the Executive, Planning and Finance Committees.

Falconer has served as a board member of the Boys' Club of Lancaster and is currently a member of the Advisory Council of Junior Achievement. He has also served as president of the Manufacturers Association.

As a member of St. James Episcopal Church, Falconer is a member of the Parish Finance Committee.

Commenting on plans for the 1974 United Way Campaign, Falconer stated, "There is an urgent need to maintain and strengthen our voluntary agencies and the services they offer. The United Way is designed so that we as individual members of our community can help each other, while we still have an opportunity to do things voluntarily, for ourselves."

He continued, "The United Way must be even more successful in 1974, because all of us are the losers if our voluntary agencies can't make it."

8 Milk Market Orders Changed

USDA's Agricultural Marketing Service (AMS) said the amendments are based on a public hearing in Washington, D. C. Feb. 20-28. It was requested by cooperative associations representing dairy farmers in each of the eight orders. USDA's final decision based on the hearing was submitted for producer approval through their cooperatives March 28. The

amended orders are identical to terms of the final decision.

From April through July this year, the price of all milk sold for manufacturing uses, except that going into butter and nonfat dry milk, will be the Minnesota-Wisconsin (M-W) price, which is the average of prices paid by processing plants in the two states for manufacturing grade milk. Milk used to make butter and nonfat dry milk will be priced up to 50 cents lower per hundredweight.

USDA officials have not yet reached a decision on the

longer-term pricing of milk for manufacturing uses, also considered at the Feb. 20-28 hearing. The time for submitting briefs concerning the hearing testimony on appropriate pricing after July has been extended to April 15. These should be sent to the USDA Hearing Clerk, USDA, Washington, D. C. 20250.

Copies of the amended orders may be obtained from market administrators of the orders, or from the Dairy Division, Agricultural Marketing Service, U. S. Department of Agriculture, Washington, D. C. 20250.

Keener Tops 5-Acre Corn Club Growers

Mr. Clarence A. Keener Jr., Manheim RD1, won top honors in the Lancaster County 1973 Five Acre Corn Club, it was announced this week. The contest is sponsored by the Pennsylvania Master Corn Growers Assn.

Keener's yield was 134.8 bushels of dried shelled corn per acre, with Pioneer 3368. His corn was planted in a field which was double cropped the previous year with barley followed by soybeans.

Keener's fertilizer program was 200 pounds starter 5-25-10 plus 125 pounds side dressed nitrogen. He also applied approximately 10 tons of manure. Plant population was 21,000 at harvest time. Insecticide used was 9 pounds furadan per acre and Lasso - Atrex combination for weed control. Keener's yield was hurt by hot dry weather stress in August.
