NEST RUN EGGS

Prices are from Egg Clearinghouse, Inc., (ECI) Durham, N.H. and reflect trading prices for gradeable nest run eggs (GNR) on ECI, a nationwide trading center for producers, packers and marketers. GNR eggs are classified by weight in 30-dozen cases, and traded in lots of either 300 or 750 cases. Prices are FOB buyers dock, and are computed Tuesday and Thursday of each week. This week's prices for each classification were:

	New Weight		
Classification	Per Case	Tuesday	Fhursday
Extra Large	51 lbs.	0	0
Class 1 - Large	48 lbs.	5 3	53
Class 3 - Medium	42 lbs.	44	46
Class 4 - Small	39 lbs.	31	31
Breaking Stock	48 lbs.	41	42
Checks	48 lbs.	35	38

Farmers report they are having to pay increasingly higher prices for farm fuel, fertilizer, baling twine and baling wire, according to Nicholas Smith, director of the Energy Office, U. S. Department of Agriculture.

He reports that since Nov. 1, 1973, the price of gasoline used on farms has increased 29 percent, diesel fuel is 38 percent higher, and LP gas costs 21 percent more.

Prices for all categories of since Feb. 18, with the largest percentage increases for nitrogen fertilizers. Anhydrous ammonia and urea prices have nearly doubled since decontrol in October.

Current prices for twine have increased 250 percent or more from a year ago. The price of domestically produced baling wire obtained through normal channels, is expected to range from \$22 to \$25 retail per 100-pound box--up substantially over a year ago--with prices for imported wire reported varying from \$30 to \$50 per 100-pound box.

Availability of farm fuel as reported for the biweekly period ending March 22 is said to be little changed from two weeks earlier with shortages of gasoline in 30 states and diesel fuel supply problems in 16 states. The fertilizer supply situation is also about the same as two weeks ago; 44 states report a nitrogen shortage, 41 a phosphate shortage, and 39 a potash shortage.

Philadelphia Eggs

Wednesday, April 3 Prices unchanged to 2 cents lower on mediums. steady on balance. Cartoning demand fair at best and seasonally unaggressive in spite of holiday period. Offerings fully adequate to ample. Undertone steady though cautious.

HIGH PRESSURE WASHING

OF POULTRY HOUSES AND VEAL PENS

BARRY L. HERR

1744 Pioneer Road, Lancaster Pa Phone 717-464-2044

For Hog Cholera An increase in the maximum indemnity payable to swine producers whose hogs must be destroyed because of hog cholera-a virus disease that affects swine only-has been

Effective March 22, the change in animal health regulations makes it possible to pay up to \$400 for purebred and breeding swine, and up to \$200 for top quality market hogs. The previous maximums were \$200 and \$100, respec-

Indemnity Limits

tively.

announced by USDA.

Officials of USDA's Animal and Plant Health Inspection Service (APHIS) said the change will bring maximum permitted indemnity limits into line with current market prices-especially for the higher quality animals. Since appraisals are made at actual value, in most cases the indemnity paid does not reach the maximum level.

Under the cooperative state-federal hog cholera eradication program, hogs that must be destroyed because of hog cholera are appraised at their actual value for meat, breeding or feeding purposes. Indemnities are based on this appraisal, up to the limits allowable.

Federal and state governments share the cost of indemnity. If isolated cases occur in states classified as "hog cholera free," the federal share is 90 percent and the state's share is 10 percent. In other states, the federal share is 75

APHIS officials point out, however, that in order for the federal government to pay either the 90 or 75 percent of indemnities to producers, the states must require that all feeder or breeder swine shipped through markets be individually identified. This requirement enables animal health officials to trace animals back to their herds of origin should hog cholera be detected.

In states that do not require identification-by ear tag, tattoo or other effective means-the federal share of indemnity would be only 50 percent of the appraised value.

DYNA Farmline Motors

SINGLE-PHASE — ½ to 10 H. P.: Capacitor Start; CONTINUOUS DUTY; BALL BEARING; **TOTALLY ENCLOSED**

Specially Designed to Produce Operating Characteristics to Fulfill Farm Requirements for Hard-Starting, Long-Life, Rugged Use Motors.
