## Average Custom Machinery Rates Computed for State

Each year, the Pennsylvania Crop Reporting Service complies a list of rates charged by custom operators for various farm jobs. The 1974 rates are shown in the tables below.

bushel, rather than per hour, to reduce the variation because of machine size. Individual rates charged for some jobs are frequently much higher or lower than Most of the rates are the average rate, because of

stated per acre, ton, bale, or differences in working conditions, services performed, or even the operator's eagerness to do custom work. There, the average rates shown, should not be considered absolute indications of fair charges.

Because they are averages of what others in the state are charging, they may be helpful as a guide in establishing a rate appropriate for your own situation, especially if there is no established rate in your area for the service you are considering.

Average rates are shown separately for most items by Mountain section, which

includes the northern tier

## Balanced design and platforms to 20 feet give the John Deere 4400 capacity that may surprise you

Be your own judge Compare a John Deere 4400 with 20-foot platform to others in its class. See what balanced design can mean to you Quik-Tatch platforms are available with bat or pickup reel There's aggressive, wedge-action threshing with a 38-inch cylinder Long walkers have 6-inch crank throw for good separation Exclusive auger conveyors help feed the full shoe width uniformly. The grain tank holds 72 bushels, or 102 with extensions There's a 95-hp engine-gas or diesel. See and compare the 4400 soon

## In our feeds helps you control

\* ATROPHIC RHINITIS

**★** SCOURS

## **★ CERVICAL ABSCESSES ★** STRESS

AUREO SoP 250\* has proved to be the one feed additive that provides a wide range of benefits to pork producers. No other antibacterial in feed does so many things to help produce fast gains improve feed efficiency - and provide superior protection against the major diseases that threaten sows and growing hogs.

AUREO S-P 250 helps save feed - reduces labor and medication costs — by keeping hogs gaining in the presence of atrophic rhinitis. controlling bacterial scours, reducing cervical abscesses - and helping prevent these diseases during stress.

AUREO SoP 250 is beneficial at every stage of growth and production.

\*AUREO SoP 250 is the registered trademark for American Cyanamid Company's premix of AUREOMYCIN® chlortetracycline SULMET®

MARVIN J. HORST DAIRY EQUIPMENT

The ZERO CONCORD is the only system that provides stable milking vacuum at the teat end — in parlor or stanchion barn — with a low

or high, short or long, pipeline—and without injecting air into the milker units to move the milk Only with stable vacuum and no air injection can you hope to reduce leucocyte counts up to 65%—increase milk production as much as 20%—and prevent off-flavor

The safe, stable vacuum is made possible by a patented, scientific principle TWIN-VACUUM whereby one vacuum milks the

cows, and a different vacuum moves the milk through a separate pipeline into the bulk tank in addition—thanks to ZERO's patented SPATTER-SPRAY Automatic Washer and new, improved, high-capacity, transparent milker unit—you have built-in, "push-button",

visible self-cleaning and sanitizing of the entire system — without disassembling. And there are many other advantages
