

JUNE 10-16

A Sprinkle or two, then the sun peeks through.

Don't let that weeding go... Jack Johnson died June 11, 1946... Third quarter of the moon June 12... Father's Day June 16... Average length of days for week, 15 hours, 17 minutes... Four Nazi saboteurs captured on Long Island June 13, 1942... Baseball's "squeeze play" invented June 16, 1894... Admitting you are wrong makes you strong. Old Farmer's Riddle: What goes from one city to another without moving? (Answer below.)

Ask the Old Farmer: Did you ever hear of using a piece of dried fish-skin to settle coffee? G.N., Little Rock.

Yes, but that was when coffee was merely ground. With some of the pulverized varieties the whole darned codfish wouldn't settle it.

Home Hints: If the end of your transparent tape sticks to the roll, place it in the refrigerator for approximately ten minutes. It can then be loosened without breaking either fingernails or tape... Riddle answer: Railroad tracks.

OLD FARMER'S WEATHER FORECASTS

New England: Intermittent spring showers for first part of week; cloudy and cool by end of week.
Greater New York-New Jersey: Mostly clear to start, then becoming hot; some rain and cooler latter part.
Middle Atlantic Coastal: Generally clear and very warm at first, then light rain; moderately heavy rain at end of week.
Southeast Coastal-Piedmont: Week begins mostly clear and warm, then rain; rain continuing to end of week.
Florida: Rain off and on all week from possible tropical storm.
Upstate & Western N.Y.-Toronto & Montreal: Rain starting in west, then moving east by midweek; heavy rain latter part except sunny and warm in west.
Greater Ohio Valley: Early week pleasant and hot; intermittent hard rain at week's end.
Deep South: First part of week clear and hot; end of week rainy and cooler.
Chicago and Southern Great Lakes: Hot to start, then rain and cooler; partial clearing latter part, then more rain on week-end.
Northern Great Plains-Great Lakes: Week begins hot and showery, then cooler; rain, heavy at times, latter part.
Central Great Plains: Hot in east and rainy in west to start, then cooling rain in east by midweek; end of week clearing and hot.
Texas-Oklahoma: Partly cloudy and hot at first, then rain and cooler; clearing and hot latter part.
Rocky Mountain Region: Week begins rainy, heavy in north, then mild end of week mostly sunny and warmer.
Southwest Desert: Generally clear and hot throughout week with highs reaching 100 by week's end.
Pacific Northwest: First part of week rainy and cool; becoming partly sunny by end of week.
California: Mostly cloudy to start, then rain by midweek; partial clearing in south by end of week.

HOW HUMIDITY AFFECTS COMFORT

You may be risking the health and comfort of your family and yourself without even knowing it -- if your home is too dry!

According to the American Society of Heating, Refrigeration and Air Conditioning Engineers (ASHRAE) the comforts of home are more so when the relative humidity indoors is between 30 and 60 percent.

An ASHRAE study shows that higher humidity deserves a warm welcome. They discovered that when the degree of dampness in a cool room is raised, people begin to feel warmer immediately.

Low levels of humidity not only leave you out in the cold, they can also contribute to giving you a cold. Medical opinion attributes the increased incidence of respiratory complaints in winter to low indoor humidity. Dry air absorbs moisture from everything it en-

counters, including the membranes of the nose and throat. It makes the skin feel itchy and flaky too.

In addition, relative humidity has been shown to have a significant effect on airborne infections. At 50 percent relative humidity, the greatest number of germs are destroyed, and influenza viruses lose much of their virulence.

This may come as shock to some, but more moisture in the air also means fewer static shocks when walking on carpets or handling paper and fabrics. A humidity percentage of at least 45 is needed to keep the sparks from flying from most things, and wool and some synthetics should be wetter still.

Fortunately, you can put a damper on all these problems with a humidifier from Westinghouse—and so keep from feeling high and dry!
