

Tina Acker Chosen Dairy Princess

Sixteen-year-old Tina Marie Acker, daughter of Mr. and Mrs. Samuel B. Acker, Chester Spring RD1, was named 1974 Chester County Dairy Princess at ceremonies held at the Russellville Grange Thursday night.

First runner-up was Martha Shivery, daughter of Mr. and Mrs. Paul C. Shivery, Cochranville RD1, a

1973 graduate of Oxford Area High School and a student at the York Academy of Arts.

Joy Rothenberger, daughter of Mr. and Mrs. Stanley Rothenberger, Oxford RD1, was second runner-up. She is a 1972 graduate of Oxford Area High School and is a student at Mansfield State College.

Tina was crowned by Susan Blevins Kauffman,

1964 Chester County Dairy Princess and now the wife of Robert L. Kauffman, Peach Bottom, and Bernice Prange Springer, 1962 Chester County Dairy Princess and the wife of Kenneth Springer, Cochranville RD2.

A senior at Downingtown High School, Tina has been a 4-H member for six years and owns two dairy animals of her own. She plans to major in physical education in college. Her family has been dairying for 25 years and are milking 300 head of Holsteins.

Judges were Mrs. William Roberts Jr., home economics teacher at Lincoln Junior High School, Lancaster; Miss Janet A. Wark, extension home economist in Cecil County, Md.; and N. Alan Bair,

assistant Lancaster county agent.

Boyd C. Gartley, director of public relations for Interstate Milk Producers Cooperative, was master of ceremonies.

Fourteen girls competed for the title. Other contestants were: Tina Kulp, Speice Road, Pottstown; Karen Lynn Laffey, Glenville Road, Cochranville; Sharon Louise Lester, Lincoln University RD1; Judy Lindsey, Oxford RD2; Beth Reid, Greenwood Farm, Parkesburg; Mary Ann Tkaczuk, Elverson RD2; Barbara Walton, London Grove; Joyce Weaver, Glenmoore; Sara Weinstock, Pothouse Road, Phoenixville; Linda Yeager, Phoenixville RD2; and Carol Yoder, Elverson RD1.

New Oil Discovery

Gulf Oil Company—U.S. announced that a significant oil discovery has been made by this Mariner II semisubmersible rig in the Gulf of Mexico, 110 miles southeast of New Orleans. The discovery well is the first wildcat to be drilled on acreage leased by the Federal Government in December, 1973. Gulf (50%)

and its partners—Texaco and Tenneco (25%)—paid \$61 million for the lease on the 5,544-acre tract. The company said multiple oil bearing sands were logged and cored to a depth of 8,391 feet on the well which has been projected for 10,000 feet. Although development drilling on the tract will continue into 1975, Gulf said oil from the new discovery probably will not begin flowing to U.S. consumers before 1976, due to the long lead times necessary to build and install production facilities. The Mariner II rig is owned and operated by Sante Fe Drilling Company.

Inch A Year
Earth fractures from the Mid-Atlantic Ridge cut across Iceland. The spreading ridge adds nearly an inch a year to the island's width.

New Idea's Uni-System

If you haven't seen Uni lately, you haven't really seen Uni at all.

Just about the only thing that has stayed the same over the years is the "system." The idea of an interchangeable Power Unit which you switch from one Uni harvesting unit to another. Everything else about Uni has changed—for the better.

For example, there's the big new No. 717 Uni-Combine. It has 20% more capacity than the popular No. 710, and handles up to six 30" rows of beans, or four wide rows of corn.

And the new Uni-Picker. It features improved capacity, and it's more reliable than ever. It's still the only self-

propelled picker on the market. The improved Superchopper has a bigger 21" wide cutterhead and wider feed rolls for high-speed feed and big capacity.

The new diesel Power Unit has a rugged 256 cu. in. turbo-charged engine with 95 available PTO horsepower. Easily handles the Uni-Picker, both Uni-Combines, and Uni-Sheller.

See for yourself. Then you'll be telling your neighbor, "If you haven't seen Uni lately, you haven't really seen Uni at all."

Uni-System just plain makes more sense.
