## DON'T LOSE YOUR PROFITS TO SUMMER SLUMP

### Put an Agway LPS feeder in your pasture

Studies have shown that when Agway LPS (Liquid Protein Supplement) is offered free-choice, each cow can—and does—adjust her LPS intake to balance her protein needs. So as pasture quality falls off, cows increase their consumption of Agway LPS to maintain the protein level they need to sustain top production.

Agway LPS has the slowest ammonia-release rate of any liquid supplement in the Northeast. That means the bacteria in the rumen have more time to convert ammonia into high-quality protein so you get optimum nutrient use by your cows. Get the facts and figures from your Agway Dairy Enterprise Salesman. And protect your milk checks against pasture slump.

### Balance your forage/grain program with Agway Ratio:Right feeds

Ratio:Right feeds supply *only* the energy and protein needed to balance your forage-grain program. You get top production without waste. And save on feed costs.

Ratio:Right is a line of feeds in which the *ratio* of energy to protein has been carefully selected to balance the feedstuffs produced on Northeastern dairy farms—including yours. So you no longer have to overfeed energy to meet protein requirements. Or vice versa.

With the pasture season here, it's important to review your feeding program with your Agway Dairy Enterprise Salesman. He'll help you select the Ratio:Right feed your cows will need as summer pasture replaces a portion, or all, of your forage.

### THOUGHT FOR THE WEEK

When your work speaks for itself, don't interrupt.

### More milk-check insurance...the Agway TDR Profile

Total Dairy Ration is a computer program that considers total protein, energy and fiber needs plus calcium/phosphorus and forage/grain ratios. It provides the kind of information you and your Agway Dairy Enterprise Salesman need to choose the proper Ratio:Right feed to achieve top milk production and higher income over feed costs. The Agway TDR Profile helps you use the results of a forage test to the greatest advantage.

Your Agway Dairy Enterprise Salesman has records to show that when TDR Profile was used to rebalance the feeding program for a 100-cow herd, feed savings amounted to \$209 per week. Can you think of a better reason to contact him...soon?
