LACTO-PELS "16" or "20"

Good Cows and Good Feeding Pay Off!

Formulated To Meet **THE NEEDS OF THE HIGH PRODUCER**

Beacon Lacto-Pels are formulated to meet the needs of high producing cows, even when roughage quality is average or less than average. Lacto-Pels is a feed designed to get the most milk possible from the grain fed.

Cows relish this highly palatable feed and clean it up readily, even in milking parlors. Because they do, even the highest producers get the energy they need for top milk production without depleting body reserves.

Lacto-Pels are uniform, flow well and are especially suited to bulk handling and rapid feeding.

Protein is guaranteed at 16% or 20%. Fat at not less than 3½% and crude fiber no more than 8%. It's a highly efficient feed.

Palatability comes from the use of cane molasses with wheat middlings and other ingredients. Corn distillers grains are present as a source of fat and energy, and for their milk stimulating properties. Dehulled soybean meal is the chief protein source, and corn and wheat middlings all help provide the highly digestible energy.

Like all Beacon dairy rations, Lacto-Pels are fortified with trace minerals plus 3,000 units of vitamin A per pound and 6,000 units of vitamin D. This is three times the level of vitamin fortification in ordinary dairy rations and gives good insurance against deficiencies caused by poor or insufficient roughage.

Beacon Lacto-Pels help cows to maximum milk production for each 100 pounds of feed.
