The Youth committee will sponsor a swimming party at the home of Mr. and Mrs. Earle Gilbert Sr., Port Deposit R.D., Md. Friday, August 16. Grangers and guests will go in a group, leaving the Grange Hall at 7

Pa. Third In Peach **Production**

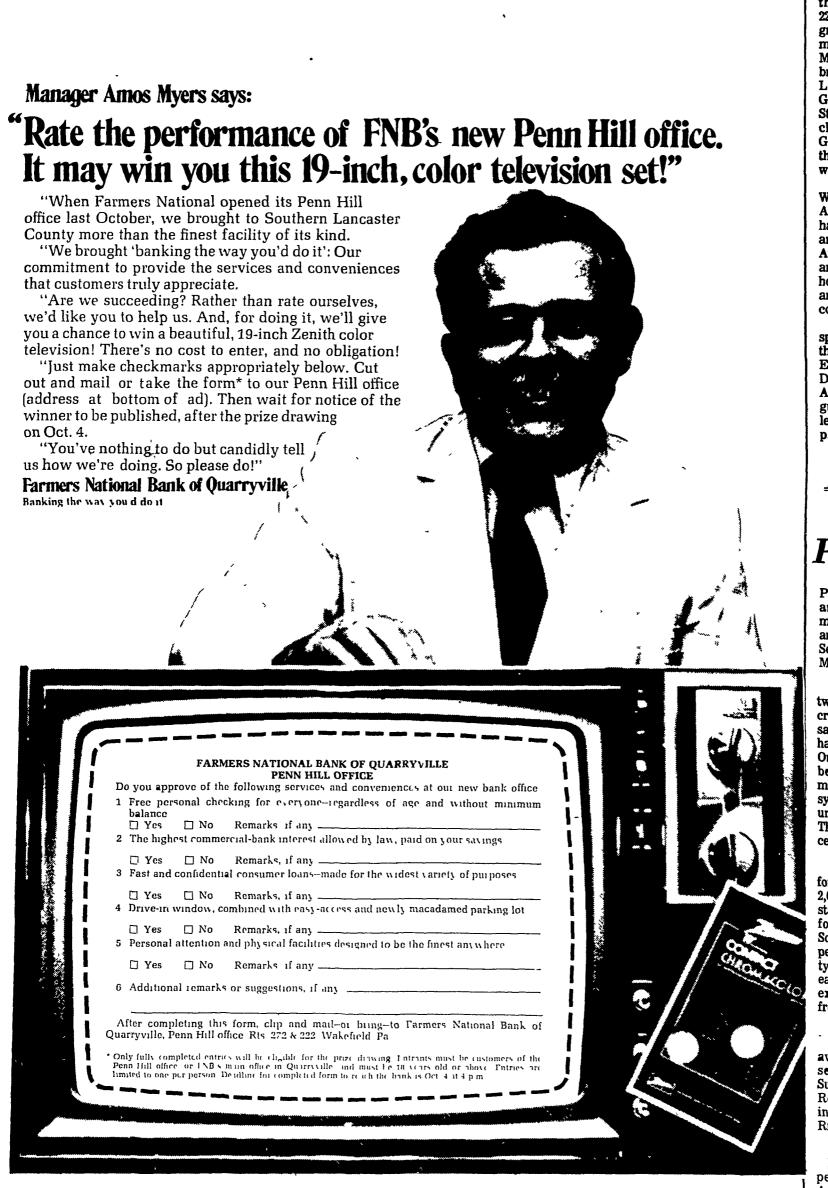

Early peaches grown in Pennsylvania orchards now are available in supermarkets, at roadside stands and public farm markets, Secretary of Agriculture Jim McHale said today.

"We have recovered from two years of short peach crops," Secretary McHale said, "and this year will have an adequate supply. Our consumers can expect to be able to buy prime mountain-grown Pennsylvania peaches from now until after Labor Day. They'll find them of excellent color and flavor."

Pennsylvania's production for 1974 is estimated at 2,083,000 bushels, making the state third in the nation, following California and South Carolina. Most of the peaches are of the free-stone type, which are best for eating fresh. They also are excellent for canning or freezing.

The first variety to become available is Red Haven. Midseason varieties include Sunhigh, Loring, Blake, and Redskin. Late varieties include Elberta RioOsoGen(cq.).

Most Pennsylvania peaches are grown in Adams, Franklin and York Counties, with other leading counties including Berks, Lehigh, Juniata, Lancaster and Erie.
