

FFA Sweetheart and Teen Leader

[Continued From Page 1]
This past summer, Jane exhibited the reserve junior champion Guernsey at the

District 4-H Show and had the junior grand champion at the Chester Fair. She also showed her animal at the All-

class. Jane has shown much leadership capabilities in 4-H work by serving as a teen

leader and by attending the 4-H Leadership Conference and the Teen Leader Camp at Dublin Gap.

Jane said that she appreciated the 4-H work that she has been involved in and explained that 4-H had helped her to be more outgoing.

"4-H has given me a lot of confidence in myself and now I enjoy talking with people where once I was shy."

School activities also keeps Jane busy as she is a member of the Future Teacher's Club and the school band and is also a reporter for the newspaper. She also belongs to the student senate and tutors elementary students in reading.

Jane began her reign as Sweetheart early this week as she was invited to the banquet for Interstate Milk Co-op in Philadelphia. Within the coming weeks she will also be attending many of the FFA functions and the Farm Show.

"I know I'll be busy," she said "but FFA work has always been interesting and I'm sure I'll enjoy representing our chapter." Jane is the daughter of Mr. and Mrs. Robert McSparran and resides with her parents on their 230 acre farm.

Russell A. Mease

Mease Joins Hubbard

Russell A. Mease is the newest addition to the field marketing team of Hubbard Farms, and will be concentrating on sales and service for the new Hubbard Leghorn. The announcement of his appointment was made by Lowell R. Blass, Hubbard director of sales.

Prior to joining the Hubbard organization, Mr. Mease spent 18 years with Babcock Poultry Farm, Inc., most recently as vice president and general manager of the Lititz, Pa., branch.

Consumers' Corner

Return, Recycle, Use Less
Nearly everything we buy comes in a package or container. Bottles, boxes, bags, wrappers, cans and papers. Most people are in the habit of throwing these things away. That means wasting them. Paper and cardboard are made from trees. Cans are made from metal. Glass is made from silica and sand melted together using lots of electricity. All these are natural resources. If we keep throwing stuff away someday there won't be enough natural resources left to make the things we need.

One thing we can do so as not to waste resources is recycle the things made from them. Recycle means return to use again. Not everything can be recycled but much can. Check to see if there's a recycling center near you. Even better is to use returnable containers (Recycling uses a lot of energy). Returnables are things that can be used again just as they are. Many of the materials used in packaging cannot be returned or recycled, so the most helpful thing we can do to not waste resources is to use less of these things.

The most we can do to help conserve our trees and rivers and other natural resources is to use only what is absolutely necessary, return and reuse whatever possible, and recycle the things that can't be reused.

Born and raised on a Pennsylvania farm, he is a graduate of National Agricultural College. He will continue to reside in Manheim, Pa., with his wife and children.
