

## 1975 Feed Grain Details Announced

A 1975 national feed grain allotment of 89 million acres - the same as for 1974 - was announced recently by the U.S. Department of Agriculture.

The allotment represents the number of harvested acres of feed grains, based on the estimated national average yield, needed to produce the quantity of feed grains (less imports) that will be used domestically and for export during the 1975-76 marketing year. Projected 1975 per bushel feed grain yields on which the allotment is based are

93.0 for corn, 60.0 for grain sorghum and 45.5 for barley. The allotment does not represent a limit on acreage but is computed only for the purpose of distributing payments to producers should such payments be required.

The department today also announced:

The average loan rates in effect in 1974 for wheat and feed grains will be continued at the same levels for the 1975 crops. The present per bushel loan rates are \$1.37 for wheat, \$1.10 for corn, \$1.05 for grain sorghum

(\$1.88 per hundredweight), \$0.90 for barley, \$0.54 for oats and \$0.89 for rye.

There will be no loan programs for soybeans, dry edible beans, flaxseed, gum naval stores and honey, beginning with the 1975 crops. The department said little use has been made of the loan program for these permissive-support commodities in recent years because market prices are two to three times loan levels. Continuation of loan support on these commodities when not needed would require unnecessary administrative expenditures, the department pointed out.

Wheat and feed grain loans will no longer have identical maturity dates but will mature 12 months from the first day of the month in which the loan is made. This procedure should assure producers more flexibility in marketing crops under loan.

A purchase program for honey for which price support is mandatory will continue to be available.

Resale prices per bushel (not including carrying charges which vary) will be \$2.36 for wheat, \$1.59 for corn, \$1.51 for grain sorghum (\$2.70 per hundredweight) and \$1.30 for barley. This established rate of resale will assure producers that government-owned grain which may be acquired will not be used to drive market prices down to target levels. Oats and rye which do not have target prices will be resold at \$0.78 and \$1.28 per bushel averages, respectively, plus carrying charges, which makes the resale prices comparable to those commodities which do have target prices.

A resale policy on any honey acquired under the purchase program will be announced later.

On April 11 the department announced a 1975 national wheat allotment of 53.5 million acres. The allotment does not represent a limit on the amount of wheat that may be planted. It is used solely to determine what payments would be made to wheat growers if the national average market price for wheat during July-

## Fulton Grange Holds Pie-Corn Contest

Fulton Grange 66 met on November 25th with Master Donald Trimble presiding. Colerain Grangers were guests for the evening.

It was decided to give a donation to the Arthritis Society. It was announced that Miss Elizabeth A. Lantz is the Miss Solanco Contestant under the sponsorship of the Grange.

Lecturer, Mrs. Joyce Holloway opened the program with reports on the State Grange from delegates, Mr. and Mrs. Gyles Brown. Comments were also given by other members who attended State Grange. Mrs. Ruth Ann Wood won a pumpkin by guessing the correct weight of it.

The winners of the corn and pie contest were named. Winners for their apple pie were Mrs. Ann Giffing - first; Esther Brown - second; and Mrs. Laura McSparran - third. Pumpkin Pie: Mrs. Delores Baker - first; Mrs. Dorothy Stauffer, second and Mrs. Marian Holloway third.

The contestants were awarded baking dishes as

prizes. Judges for the contest were Mrs. Glenn Myer and Mrs. William Fredd.

Prizes were awarded to the following men for their corn exhibit: Donald Trimble - first; Thomas Galbreath - second; Richard Maule - third; William Maule - fourth; Clifford Holloway, Jr. - fifth and Loren Brinton - sixth.

Prizes for the contest were donated by Red Rose Farm Supply, Agway, Lancaster Bone Fertilizer, A. L. Herr and Brothers, Ross H. Rohrer, Inc. and Robert Groff.

Jim Hilton, agriculture instructor at Penn Manor High School, was judge for the contest.

A slide presentation was given by Clifford Holloway.

The next meeting will be on December 9th when the Junior Grangers will present a Christmas pageant. There will be no meeting on December 23rd. The Grange will go Christmas caroling that evening with a gift exchange following.

## OVER TEN YEARS EXPERIENCE TELLS THE STORY!!

**ROUGHAGE  
ANALYSIS  
INCREASES  
YOUR  
POTENTIAL**

- For Higher Milk Production
- For Greater Income Over Feed Cost
- For Improved Net Returns

Feed, whether you buy it or grow it, represents an outlay of 25 to 45% of your milk check. Beacon's Free Roughage Analysis Service can help you lay the foundation for an efficient and effective feeding program for your herd.

"Eyeball" analyses won't do the job. You need scientific sampling, high quality laboratory analyses of the samples, and . . . most of all . . . the recommendations of skilled and practical dairy nutritionists on how to apply these analyses to benefit your herd.

The Beacon Roughage Analysis Service will help you toward the three goals all dairymen share: Higher Milk Production, Greater Income Over Feed Cost, Improved Net Returns.

There is no charge for this very worthwhile service. The Beacon Advisor will visit your farm, take samples of all your roughages. He'll send them to the Beacon laboratory for analysis. You'll get back a report and feeding recommendations tailored specifically to your herd, its production level and your roughage supply.

## FREY FREE STALL

**LIFETIME FREE STALL HOUSING**

Cut bedding costs 75 per cent, reduce labor for barn cleaning and cow washing; reduce teat and udder injury to the minimum — house your milking herd in free stall housing. Each cow provided a stall for loafing. She won't be stepped on, the rear curb forces manure out into alley for mechanical cleaning or washing. A few minutes twice a day cleans the stalls and curbs, bedding lasts almost forever if your stalls fit the cows. Popular sizes are 6'6", 7' and 7'6". Size 'em by breed.

Our free stall partition may be mounted on wooden head boards or we make a steel divider. Set the legs in 8 to 10" concrete curbs to hold and retain bedding. Stall floor can be soil, sand or gravel. Bedding — straw, sawdust, peanut hulls, ground corn cobs, etc. Should be installed with paved alley surface 8 feet wide for mechanical cleaning or washing.

- 8 Models all steel welded farm and feedlot gates
- 2 Models all steel welded head catch gate
