a film program devoted to the latest developments and research in agriculture.

A presentation by your John Deere Dealer

A. B. C. GROFF, INC.

10:30 a.m., Thursday, January 16, 1975
Dealer's Store
New Holland, Pa.
Lunch Will Be Served

Consumers' Corner

Penny Pinching

U.S. Treasury Department is promoting the reputation and use of the penny. The coins are needed to protect the nation's dwindling supply of pennies.

The farou, bronze coins—95 percent copper, 5 percent zinc—have been a penny's worth of value for over 100 years. Though Treasury makes 35 million pennies a day, 70% of the Federal Government's coin production is for pennies alone.

Official estimate that about 22 billion pennies are currently in circulation. Speculators fear that copper prices might go up enough to make it profitable to melt pennies. Treasury research indicates that melting could have to be done by hand and would be more expensive than the copper will eventually sell for.

The Treasury Department has gone so far as to have contests in order to get pennies back in circulation. An one turning in \$25 worth of pennies to a participating bank may be awarded an Exceptional Public Service Award.

TWO GREAT SUPERSTARS

FROM NORTHROP KING

You should plant a Northrup King Superstar Corn Hybrid

The Superstar rating is awarded sparingly—must be earned by each hybrid. Superior yield is the first benchmark, but not the only one. Broad adaptability—to soils, areas, moisture and temperature—comes next. The ability to withstand stresses, perform under adverse growing conditions, is another must. Overall, the hybrid must gain popularity with farmers, be ordered again and again for more and more acres.

For championship yields order a Superstar.

Your Stanford-Northrup King Dealer Has The Variety Best Suited for Your Farm.

Plant all you can get!

AT LAST!

A High-Yielding Alfalfa With Staying Power

- Early Maturing
- Bacterial Wilt Resistant
- Free From Leaf Disease
- High Yields
