same place.

Earl Weir, left, and Jefferson Yoder were honored with production awards at last Thursday night's annual meeting of the Chester County Dairy Herd Improvement

Association. Yoder's herd averaged 688 pounds of fat, while Weir's cows produced an average 17,684 pounds of milk.

Chester DHIA

(Continued from Page 1)
the 600-pound mark in the previous year.

The DHIA annual summary showed an average of 10,192 cows in the county between October 1, 1973 and September 30, 1974. They averaged 12,747 pounds of milk at 3.9 percent fat, for an average fat production of 496 pounds per cow. Total value of the product produced by Chester County cows in that period was \$1159. The cost of the grain to feed the cows averaged \$249, hay was \$58, other forage added, \$146, and pasture costs were an additional \$12 for a total feed cost of \$465. The value of the product above feed cost was therefore \$694.

The bylaws amendments were made so that the association could have both a secretary and a treasurer. The offices had previously been combined, with the

duties handled by Paul and Dorothy King. The Kings, however, informed the board that they no longer wanted the job. Mrs. June Hevner, an extension office employee, was named to take over the treasurer's duties. In accepting the position, Mrs. Hevner complimented the Kings on an excellent job of bookkeeping.

The newly elected directors, all of whom were named to a three-year term, were Joel Brown, Oxford R1, Paul H. Eby, Cochranville, and Harold J. Ranck, Cochranville R2.

CLEAN TOASTER

Shaking an electric toaster to remove crumbs may damage the small heating wires. A better way is to simply clean the crumb tray with a sudsy sponge. Always be sure the toaster is disconnected before cleaning. After washing the outside surface, follow by polishing with a clean dry cloth.

Mount Joy Cooperative Elections

Roy Alger, Palmyra, was elected president of the Mount Joy Farmers Cooperative at that group's annual meeting recently at Hostetter's Banquet Hall in Mount Joy. Other officers elected were: Lewis Bixler, Marietta R1, vice-president; James Eshelman, Mount Joy R2, secretary; Albert Fry,

Manheim R2, assistant secretary; Henry Garber, Elizabethtown R1, treasurer; and Preston Newcomer, Mount Joy R1, assistant treasurer.

During the meeting, the coop members set the date for next year's annual meeting for January 22, 1976, at Hostetters.

Will your feed efficiency measure up to Mol-Mix?

To any cattleman, whether he's a feedlot operator or a cow-calf man, feed efficiency is the name of the game.

But mere supplementation may not be the whole answer. If you choose an inferior brand, you may just be wasting your money.

Mol-Mix liquid feed supplement contains extra "performance oriented" ingredients that many others don't have. Things like: phosphoric acid, ammonium polyphosphate, corn distillers solubles, and condensed fermented corn extractives. A feed supplement, as with any manufactured product, is no better than the quality of its construction. You get what you pay for. Mol-Mix is made with the best ingredients available.

It's just an out and out fact that Mol-Mix will make more net profits for you. Some have reported as much as \$5.00 return for every dollar invested in Mol-Mix.

Stop in at your Mol-Mix dealer and find out how. He may just have a nice surprise for you.
