tan + and atrazine fishin' herbicide" gn-

When I get my corn planted, I'm set for a little fishing. Before other farm jobs. With no cultivating or spraying a catch-up herbicide.

of Sutan[®]+ herbicide and atrazine in the soil when I disc my corn ground for planting. Sutan+ takes care of the grass weeds. Atrazine gets the broadleaves.

Mixed in the soil, this combination works. Rain or shine. Sutan + and atrazine are right in the soil destroying weeds as they sprout. No waiting for rain as with surface-applied herbicides. It's always dependable!

Sutan + is designed to give excellent crop

tolerance on a wide range of soil types under all variations of weather stress and application errors.

Sutan + with atrazine has a top reputation for That's because I incorporate a tank mix combination reliable broad-spectrum weed control in corn. No wonder I call it my "go-fishin' herbicide" combination.

> Use it on your corn ground, too. Check dosage rates on the product container. Always follow label directions carefully. See your Stauffer supplier for Sutan+. Stauffer Chemical Company, Agricultural Chemical Division, Westport, Connecticut 06880.
