

NEPPCO Meetings Slated

The Neppco service in which poultrymen are showing the greatest interest is the newly revised Members Advisory Service according to Dodge. To use it, a member with a problem simply calls the Neppco office and is immediately put in touch with a person who has expertise in that particular problem area. Dodge said Neppco has also developed a large Technical Committee of specialists from northeastern colleges, extension service, and industry, who have volunteered their services as consultants to Neppco members for such troubleshooting assignments. Their expertise covers the general areas of production, processing and marketing for eggs, broilers and turkeys.

Dodge and Neppco's executive director, Richard I. Ammon, have been the principal speakers at these meetings, which have been co-sponsored and promoted by state poultry associations, the local extension service and industry firms.

Five more such meetings are planned over the next two months in Connecticut, New York and Pennsylvania.

The Pennsylvania meeting will be held in the Lancaster Farm and Home Center on Thursday evening, March 20. It will be co-sponsored by the Lancaster County Poultry Association but will be open to all interested poultrymen.

At their regular quarterly meeting last week in the Farm and Home Center, the Red Rose DHIA board of directors elected new officers for the coming year. Robert L. Kauffman, Jr.,

left, of Peach Bottom, was elected secretary. James G. Kreider, center, Quarryville, was named president, and Robert Kendig, Conestoga, is the new vice-president

Ayrshires Complete Records

In the herd of John H. Stick, Green Brae Farm, Lebanon, Pennsylvania, a senior-four-year old registered Ayrshire cow named Green Brae C. P. Countess has completed an official milk production record of 17280 pounds, with 740 pounds of butterfat, on twice daily milking for 305-day DHIR testing period. This record is one of many being made by increasing number of registered Ayrshires on the Ayrshire Breeders' Association official DHIR testing program. Countess' record is 1 1/2

times the national average for all dairy cows.

In the herd of Charles H. Gable, Conebella Farm, Elverson, Penn., a seven-year old registered Ayrshire cow named Conebella Betty Rue has completed an official milk production record of 16800 pounds, with 684 pounds of butterfat, on twice daily milking for 305-day DHIR testing period. This

record is one of many being made by an increasing number of registered Ayrshires on the Ayrshire Breeders' Association official DHIR testing program.

Rue's record is 1 1/2 times the national average for all dairy cows. The Ayrshire breed is noted for persistent, profitable production of nutritious, quality milk.

The De Laval Unitized Vacuum Group

OUR RUGGED Space Saver

Because the tank and pump are "unitized", the De Laval vacuum pump takes up less space. That means more room in the parlor. We designed it for easy cleaning and maintenance, ruggedness, long pump life, and quieter operation. With a sufficient capacity for every dairy farm. See one today.
