WOW! THAT IS BOUMATIC
Yes, It Is True!

84% of all cows in the state of California are milked with Bou-Matic Milkers.

MR. DAIRYMAN:

The dairy farmer in California, due to his breeding and management and his feeding program, has come up with a very high productive herd over the last 8 years

These rolling herd averages are 54 pounds and up which is nothing uncommon, they were forced to look into better milking systems that would do the job with a minimum of udder irritations such as

- 1—Low Vacuum of 10½" to 11½"
- 2—Not flooding at the teat end
- 3—No back flushing of the teat canal
- 4—Proper pulsations per minute
- 5—Milking all four quarters out together
- 6—Alternating twin-pulsation for front & rear quarters
- 7—Inflations which prevent the lines from bulging and climbing
- 8—Visi-claw for visible milking - plus many more features

Whether you are milking 15 cows or 1500 it will pay you to investigate what Bou-Matic can do for you and your herd. A Dari-Kool Bou-Matic Milking System along with good herd management has proved a winning combination for thousands of dairymen. Ask any Dari-Kool Bou-Matic user.

PROFESSIONAL MILKING SYSTEMS FOR THE MILKING PROFESSIONAL.
