ED ESHLEMAN'S

WASHINGTON REPORT

As might be expected, much of the mail I have received recently refers to the Nation's economic situation. A running theme in many of the letters is that Federal spending should be cut.

On the other hand, my mail also contains numerous letters from people who want this program or that exempted from any spending cuts. I hear constantly from those who want to see some specific item in the Federal budget not only left untouched when it comes to cutbacks, but in many cases want that particular appropriation increased.

My point is that I seldom hear from anyone suggesting specific spending reductions. Those in favor of cuts tend to deal in general terms while those wanting money spent refer to particular programs.

Maybe what those of us in Congress need to hear more about is what specific things my constituents want reduced. And the specifics should not deal in only the easy answers.

For instance, I'm aware that my District does not back spending for foreign aid, and my votes have been consistently against such expenditures. But if foreign aid was completely eliminated, it would only make a small dent in the \$52 billion proposed deficit.

Another area often discussed for cutting is defense. Here, too, I have supported reductions in the past, and in my time in the Congress the defense portion

of the budget has dropped from nearly 50 percent to under 30 percent. But how much further do we go before we fail to provide adequate military protection for our purely national interests? And, since between 60-70 percent of the present defense budget goes for personnel costs, any sub-

stantial cutbacks are going to end up throwing large numbers of people out of work. Therefore, while some additional cuts may be possible in the military area, that is not the whole answer.

Some will suggest welfare spending as a source for cuts, and again, maybe some unnecessary money can be eliminated from welfare costs. But in a recent vote I was one of only 38 in the House who was willing to take an unpopular stand on the food stamp program because I believed that Federal students and strikers should be eliminated from the program in order to reduce its expenses.

Therefore, the meaty question is where do we begin to cut after we look beyond the more unpopular budget items? And that's where we need some guidance from our constituents. What kind of Federal spending would you prefer to see continued but, if necessary, can do without or, at least, can do with less of?

That is the kind of tough choice that Congress will eventually have to face if Federal budgets are going to get reduced. I, for one, would like to hear from you in the same kind of detail that usually accompanies requests for continued spending or even more spending. If you really believe that Federal expenditures should be cut substantially, the responsibility for recommending where cannot be ignored.

Boots Saddles 4-H Club

The Boots and Saddles 4-H Horse and Pony Club held their Feb. meeting at the Farm and Home Center. President Ray Carmean called the meeting to order and lead the pledges. Laura Allegrati called the roll to which 47 members responded.

Under new business the club's Expo booth was explained. Also a Used Tack and Clothing sale was planned to be held at the Fellenbaum Farm on the Fruitville Pike on March 28-29.

The club will be holding a clinic on April 6 with Bud Gochenauer as the instructor.

The open horse show was discussed. It will be held on April 19 at the Lancaster Riding Club. Robert Gregory, guest speaker, explained the horse bowl and judging team programs and then showed a film on nutrition.

Lori and Pam Sammons gave a demonstration of tack box equipment and its uses.
