

IFYE

(Continued from Page 1)

interviews and physicals, was notified of her acceptance in February.

From now until her actual departure in June, Fay will be attending orientation sessions and briefing meetings. Last weekend, amid a late winter snow storm, Fay traveled to Penn State where she joined with other IFYE candidates from Pennsylvania in a briefing session.

During the meeting, the youths were given insight into the life they might expect by former IFYE representatives along with learning about the economics and food problem situations in this country and abroad.

Fay will also be traveling to Washington before she leaves to attend another orientation session which is planned to help the IFYE learn about the country to which they will be traveling.

The International Farm Youth Exchange program itself began in 1948 and is one of 4-H's International programs. Selected youths such as Fay live and work with rural families in other countries for six months, learning about their way of life and working with youth programs similar to 4-H.

The program is financed both by the sponsoring county and also by the National 4-H Foundation. Funds are often donated by local groups as well as industry.

While in Germany, Fay will be living with six to seven different families and will be moving about every three weeks. While she doesn't know just what she'll be asked to do, work on the farms will no doubt be in store.

"Other IFYE's have told me that when you go to Germany you do a lot of farm work, even the women are asked to help," Fay commented.

Although the farm methods might be a little different in Germany, Fay is no stranger to farm life, having grown up on a beef and poultry farm on Eden Road in Lancaster County with her parents Mr. and Mrs. Raymond Stoner.

"I guess I'll have to learn all the farm terminology as I don't even know how to say farm in German - but I guess that will all be a part of learning," Fay explained.

Fay will be in Germany until December of 1975 and upon her return she hopes to finish her college major.

"Following my graduation, I'd like to go on to graduate school and study experimental psychology, but that is all in the future for now."

Although her future plans aren't definite, Fay has plenty to keep her present schedule full. In fact Fay left for Toronto this weekend to participate in the Junior Farmers of Ontario's meeting representing Pennsylvania as an outstanding farm youth from the United States.

LEBANON COUNTY DHIA MONTHLY REPORT

FEBRUARY, 1975

A cow in the herd of Marvin K. Meyer produced the highest lactation record for the month of February. Blossom produced 887 pounds of butterfat with 22,794 pounds of milk.

Second high producing cow came from the herd of Ernest Wagner. Number 128 produced 822 pounds of fat with 20,475 pounds of milk.

In the herd summary it was the herd of Isaac E. Zimmerman which placed high with 2.34 pounds of fat per cow daily. Second high was the herd of Dale Hostetter and Sons which recorded at 2.31 pounds of fat.

NAME OF HERD OWNER	DAYS ON TEST	NO. COWS	% COW DAYS IN MILK	MILK LBS.	% FAT	FAT LBS

Dee-licious! Purina Golden Bulky

Cows and growing heifers love the sweet flavor and aroma of Purina Golden Bulky.

It's sweet because it's high in molasses. It's light and bulky — 100 pounds fills six bushel baskets. It's a high protein ration fortified with Vitamins A and D.

Golden Bulky is versatile, too. It can be used to balance the grain in your milking ration, dry cow ration or heifer ration. You can use Golden Bulky to supplement dry late summer and fall pastures or to preserve silage. And it can be top-fed or mixed with your own grain.

Next time you stop by, let us show you how many ways you can feed versatile and nutritious Purina Golden Bulky.
