

Ayrshire

(Continued from Page 1)

Before heading to New York for the conclusion of their tour, the guests were given lunch at the Masonic Home where they conversed with area Ayrshire breeders. Conversations dealing with Ayrshire sires to the high price of fertilizer dominated much of the lunch time

break. Some of the area Ayrshire breeders who were present for the tour included: Mill Brubaker, Lititz; Mrs. Harris Horn, Thomasville; Mr. and Mrs. Samuel Martin, Stevens and Alan Blair, Associate County Agent.

Ayrshire cattle breeders and their wives from Ireland, Scotland, Wales and England joined with local cattlemen to tour the Masonic Home's Ayrshire herd on Monday morning (May 5). The tour

was in conjunction with the Centennial Celebration of the Ayrshire Breed and the National Show and Sale.

Swiss Expect Dairy Problems in 1975

Spokesmen of the Central Union of Swiss Milk Producers predict that growing milk production will create serious problems for Switzerland in 1975. The chances for cheese exports are viewed pessimistically because of the high value of the Swiss franc, as well as decreased purchasing power among prospective importers, and widening restrictions on imports. A high level of cheese production in other exporting countries could also have been cited.

Swiss milk output in 1975 is expected to increase about 1 percent from 1974's, which in turn increased slightly over 1 percent from that of 1973. Improved breeding is raising average production per cow, and Government-sanctioned milk prices are likely to be raised somewhat to offset rising costs at least partially.

While a net exporter of cheese (51,000 tons exported in 1974, 11 percent of it to the United States), Switzerland is an importer of butter, taking 12,000 tons in 1974.

AGWAY

You only need one insecticide to Control Insects in your Lawn & Garden.

Spectracide®

Your lawn is a major investment in time and in money. Yet it can be destroyed in just days by chinch bugs, sod webworms, Bermuda mites, white grubs, leafhoppers and other bugs you've probably never heard of.

There are many different insecticides you could buy to combat them. But you only need one—Spectracide. It effectively controls a wide range of bugs and can be used on your garden, as well as your lawn. Available in granular (for lawn use only) and liquid concentrate. It's simple. It's sensible. Get Spectracide.

Will your feed efficiency measure up to Mol-Mix?

To any cattleman, whether he's a feedlot operator or a cow-calf man, feed efficiency is the name of the game.

But mere supplementation may not be the whole answer. If you choose an inferior brand, you may just be wasting your money.

Mol-Mix liquid feed supplement contains extra "performance oriented" ingredients that many others don't have. Things like: phosphoric acid, ammonium polyphosphate, corn distillers solubles, and condensed fermented corn extractives. A feed supplement, as with any manufactured product, is no better than the quality of its construction. You get what you pay for. Mol-Mix is made with the best ingredients available.

It's just an out and out fact that Mol-Mix will make more net profits for you. Some have reported as much as \$5 00 return for every dollar invested in Mol-Mix.

Stop in at your Mol-Mix dealer and find out how. He may just have a nice surprise for you.
