John Deere Balers have more teeth outside the tractor tires

Heavier hay and bigger cuts mean wider windrows—so our quiet balers have extra-wide pickups. Pickup on the heavy-duty 346 is 71 inches across (including side flares) with 144 teeth; 61 inches and 80 teeth on the 336.

But that's only half the story. Usable pickup width—the area that can be used without driving tractor tires over the windrow—is the other half.

Pickups on John Deere Balers are offset 10 inches from the bale case. This puts the pickup out where it's usable—not behind the tractor tires.

Stop in and see for yourself.

Roberts, 28th (silver); Richard Hershey, Tulpehocken, 39th (silver); Bill Hostetter, Oxford, 34th (silver); and Sam Long, Solanco 36th (silver); Harry Leininger, Ephrata, 37th (bronze); Gary Lentz, Northern Lebanon, 38th (bronze); Leon Crowl, Red Lion, 39th (bronze); Darryl Wenger, Manheim Central, 49th (bronze); Sam Klassan 52nd (bronze) and Ed Breckbill, Oxford, 53rd (bronze).

In team competition, Penn Manor placed second with

BANVEL® Herbicide

POST-EMERGENCE APPLICATION IN FIELD CORN GETS TO THE ROOT OF YOUR TOUGH BROADLEAF WEED PROBLEM

HOW
BANVEL
TRANSLOCATES

Your corn crop is well along. But tough, deep-rooted weeds threaten to take over. The earlier you spray Banvel, the better, preferably before hot, humid weather.

Even though you spray over the tops of corn, normally no brittleness develops. If you see velvetleaf or pigweed, a lower rate of Banvel mixed with 2,4-D will give most effective control.

Banvel works! For one simple reason. Banvel translocates. Absorbed by leaves, stems, roots, Banvel moves with plant fluids from leaf tip to root tip. Destroys as it goes. So, no regrowth.

In permanent pasture, Banvel gives you easy control of more than 40 of the most common weeds, including wild garlic, weed brush and weed trees.

Cost of Banvel? Up to \$1.90 per acre broadcast in corn. Ask your dealer or custom sprayer for full information.
