

# Firm challenges EPA

CHICAGO - Velsicol Chemical Corporation has announced that it will challenge the Environmental Protection Agency's decision to suspend chlordane and heptachlor insecticides because the products are safe and vital to the nation's agricultural economy.

At a press conference on July 30, EPA officials announced their decision to suspend certain uses of chlordane and heptachlor. The principal impact of this latest decision will be to speed up the hearings to

cancel certain registrations for the use of these products. Action against the insecticides was first initiated by EPA in November, 1974, when it announced notice of intent to cancel certain registered uses of the two products.

According to Robert M. Morris, Velsicol's President and Chairman of the Board, company officials were shocked and surprised at EPA's latest move. "Until now, cancellation proceedings were progressing in the normal

manner. At the pre-hearing conference on July 15th, there was no indication that the cancellation hearings would not follow this normal schedule - with the hearings to start sometime in September. Further, as late as Tuesday morning, Velsicol's regulatory experts were meeting with EPA officials and there was no mention made of suspension of these products."

**FREEZING FOOD**  
Use only fresh, high-quality food ingredients when freezing for later use. Freezing does not improve the quality of food. Underripe fruits and vegetables lack flavor and overripe ones are flat and tough or soft and mushy after freezing. Meat and poultry that is tender before freezing will stay tender after freezing if it is properly prepared, packaged, frozen, and stored.

**MANHOOD TEST**  
Brazil's txukahamei Indian tribe has a manhood test requiring boys to hit a wasp nest with their fists

and suffer the consequences periodically throughout their lives. Warriors repeat the ordeal

## Swine producers slate discussion

A panel discussion with time for question and answers will be held for all area swine producers on Monday evening August 11, at the Lancaster Farm and Home Center beginning at 7:30 p.m.

The program, which is sponsored by the Lancaster County Swine Producers Association, will feature a number of hog marketing officials speaking on marketing hogs in the southeastern Pa. area. On

hand will be representatives from Hatfield Packing, Martin Packing, Lancaster Stockyards, Vintage Sales and New Holland Sales.

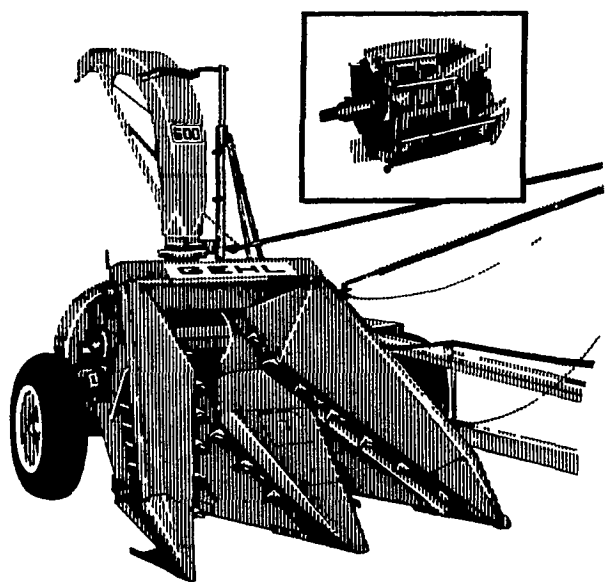

Area producers are asked to bring questions with them for the panel to discuss. Some topics to be covered will be grading and yields, selling, weight and shrinkage.

All area producers from the surrounding counties are invited to attend the program.

### WOMEN

Women are unpredictable. You never know how they are going to manage to get their own way. A woman doesn't make a fool of a man—she merely gives him

the opportunity to develop his natural capacities. There are only two ways to handle women. Does anyone know what they are?

### INSTANT SHORT CUT New Cylinder-Screen Chopper

New cylinder-screen cutting mechanism assures short, uniform chopping on the new Gehl "600" forage harvester. Powerful blower whips crops to the back of the box or into the silo. No feeder apron. Unit is shorter, front to back. Tough three-inch diameter shaft whirls cylinder at 1000 RPM. Six 21-inch long knives. 120 sq in throat area, 374 sq in screen area. Standard tungsten-carbide faced knives and cutterbar. Built-in knife sharpener. Three attachments available: hay pickup, one-row, and a two-row that handles both wide and narrow rows.

**Beacon  
Silage Pre-Serv\*  
used on your  
corn silage will  
pay for itself  
three times over.  
And that's not all!**

### Beacon Silage Pre-Serv is convenient.

You can harvest and treat corn silage at 60-65% moisture. Apply it wet or dry, with an applicator, or just sprinkled over each load.

You save labor because there's less lumping and bridging in the silo.

### It's economical.

A ton of silage requires only ½ pound of dry Pre-Serv, or 1 pound of liquid Pre-Serv.

### It's profitable!

Pre-Serv prevents heat build-up, controls oxidation, and greatly reduces spoilage and shrinkage.

You'll get up to 30% more feeding value—essential protein, carbohydrates and vitamins per ton.

### Provides more nutrients per ton of corn silage.
