## ON FARM PACKING

**Diamond Automation's NEW Farm Packer Operates With One Person At 80 Cases Per Hour,**

that's 28,800 eggs per hour.

Diamonds new Farm Packer cuts labor costs, shortens collection time, handles all egg sizes more gently and generates more time for other chores.

Diamond builds a 30 case per hour Farm Packer too!

30 CPH Farm Packer

Diamond Farm Packers operate on either pulp or plastic trays. The Farm Packers have a simple, rugged, design. Both operating on 115 volt current, the Farm Packers are adaptable to a variety of egg belt and egg escalator configurations.

Want to know more? Send the coupon or write the people who understand egg production and processing best, Diamond Automation.

## Tractor pull

By Dieter Krieg

KUTZTOWN — There was lots to do at the Kutztown Fair this past week, with cattle shows, exhibits, rides, games, and lots of people to meet. But the event which by far attracted the most attention was the tractor pulling contest on Wednesday night.

This was the first year a tractor pulling contest had been held at the fair, and it was also the first time for many of the spectators who surrounded the track.

"I thought tractors hooked up to one another to pull," one lady said. "I thought so too," replied her companion without moving his eyes away from the track. Several thousand people were on hand to take part in the excitement. Those on the

edges of the field were craning their necks to get a better view.

**5,000 pounds**
