The Yazoo Rider

The Yazoo Rider is already well known to commercial cutters. They bought twice as many of them this year as they did the year before.

It's a completely industrial-standard machine. Yet it costs about half as much as the tractors they've been using, with their belly-slung blades and huge, unwieldy gearcases.

Why are we telling residential owners about it? Because the Yazoo Rider actually costs less than well-known "homeowner" brands of belly-slung tractor mowers.

In residential use it should last a lifetime.

Try these with a belly-slung mower

- UNDER FENCES • 12" TURNING RADIUS
- UNDER SHRUBS • TO WATERS EDGE

Comes with 76", 60", 48", 42" or 36" cut. Other attachments available
