

What's New . . .

NEW SHUTTLE FEEDER
ARLINGTON HEIGHTS, IL - A new shuttle feeder, called the Super Shuttle 2, has been introduced by A.O. Smith Harvestore Products, headquartered here.

According to Owen Owens, the company's manager of automation sales, the new feeder features a high degree of durability vital in livestock feeding. He pointed out, as an example, that the Super Shuttle 2's side panels are constructed so that it is difficult for cattle to disrupt

movement of the sliding pan that distributes feed into the bunk. The unit also features extra large discharge hoppers with diverters for high volume delivery to either side of the feed bunk. The diverter may be operated manually or electrically from a remote location.

Owens said that the feeder provides an economical method of feeding for livestock farmers who prefer a center-loading feeder. To minimize maintenance,

the new feeder is designed with a minimum of moving parts. The receiving hopper and drive section, which includes an electric motor, are located at the center, where feed is directed into a moving pan. As the pan moves back and forth the length of the feeder, hinged sweeps drop feed into the bunk. The motor, which operated all feeder mechanisms, is available in either single or three phase. Extending the full length

of the sliding pan, an adjustable drive chain gives quite, accurate control of pan movement.

Super Shuttle 2 can be assembled in lengths up to 150 feet, using 5- and 10-ft. sections of heavy galvanized steel. For even discharge, sweeps and forks are placed 30-in. apart. The unit is mounted above the feedbunk by suspension from overhead supports.

Besides feeders and other automated equipment, A. O. Smith Harvestore manufactures oxygen-limiting feed storage and processing systems in sizes up to a nominal 25 by 90 ft., as well as Slurrystore manure storage systems with above ground tanks

ranging in size up to a nominal 60 by 15 ft.

Let's keep it growing for 200 more years.

Welcome God to America's bicentennial... practice what you pray.

Statement of Ownership, Management, Circulation
 Required by the Act of Congress of October 23, 1962
 (Section 4369, Title 39, United States Code)
 Of the Lancaster Farming published weekly at Lititz, Penna. for October 1, 1975.

The name and address of the publisher is: Robert G. Campbell, Lititz, Pa. Editor, Dieter Krieg, Lititz, Pa. The owner is: Robert G. Campbell, Lititz, Pa.

The known bondholders, mortgagees, and other security holders owning or holding 1 percent or more of total amount of bonds, mortgages, or other securities are: None.

	Average No. Copies Each Issue During Preceding 12 Months	Single Issue Nearest To Filing Date
