

## Wayne's Dairy **Counseling** Will Help You Put The Pieces Together!

Check these points to be covered in the Dairy Counseling.

- 1. Protecting high investment.
- 2. Preventing health problems.
- 3. Balancing nutritional needs.
- 4. Milking more money.

Help prevent metabolic diseases in your dairy herd with a preventive program of feeding with Wayne

The Wayne Maximizer Shows How

With Today's high producing herds, there are several metabolic diseases that can chip away at profits even before their symptoms become obvious Some of them may be interrelated into a complex that sometimes makes them indistinguishable

This diagram shows the importance of a total preventive feeding program and constant vigilance against potential problems. The shaded areas are the target areas for applying a Maximizer Preventive Program Note that there is no attempt to describe diagnostic symptoms Acute metabolic disorders should be diagnosed and treated by a veterinarian

DRY CALVING Acidosis Crused by
 Too little fiber. Hay or siling quant for chopped, oo fine limb directly remen fermen.

Filtor.

Titlor. . Occurs most often when feed ing for high production . Prevent by conceting improper terding practice. Use Maximizer to billings fiber and roughtings. Caused by Overly far overly conditioned cows at calcing Toom with ency damoglast of privous fact in the calcing to privous fact in the calcing the calcing damoglast of privous fact in the calcing damoglast of privous fact in the calcing damoglast in the calcing fact in the calcing fact in the calcing fact in the calcing in the calcing fact Ketosis Displaced Abomasom · Crused by Too little rough age in rumen.
