MINIMASTERS 1-2!

Minimaster 1

MINIMASTER 1 - for use in rearing cages, diameter 7 in - The push-on fitting allows Minimasters to be plugged into most standard nipple valves. Water level is pre-set and maintained by a float and genuinely reliable valve. BEC Minimasters really take the guesswork out of rearing.

Minimaster 2

MINIMASTER 2 - diameter 10 in - Eliminates the chore of jug filling and prevents any risk of dehydration. Can be used for connection with nipple valves or as satellites to Watermasters 2 and 3. Alternatively the Minimasters may be connected on to a low pressure line by using the BEC compression saddle connector. Several Minis may be taken from one point by using the small plastic Ts on top of the Minimaster

The Bec 75 Waterer:

- Takes up less room in the house more room for the birds
- Its distribution that counts - more drinking points, for the same money means that the birds have less distance to walk to water
- Lighter and more convenient to handle and clean
- At the end of the crop easy to empty house - one person can carry 50 to 100 waterers
- Easy Connections a) Saddle connector (see inset) b) Tube fittings (see inset) c) new easy method of raising and lowering the waterer with hanger box
