

# AGWAY

**If she's  
not fresh  
at 24 months,  
you lose \$60 to \$70  
EVERY MONTH  
UNTIL SHE CALVES**

**Agway total calf rations TCR I and TCR II can  
bring her to breeding weight by 14 months**

The Total Calf Ration Program was researched and developed at the Agway Farm Research Center, and supported by a field study on three dairy farms. A total of 288 animals were involved. Significant findings:

- Heifers reached breeding weight of 750 lbs. by 14 months of age
- They were nearly an inch taller than heifers grown on a conventional program—indicating that skeletal growth was obtained without fattening
- Forage saved on every six heifers raised on TCR I & II was enough to provide the

yearly forage requirements of one milking cow

TCR I is for heifers from birth through five months, and TCR II for six through nine months. It is a pelleted, complete, self-fed ration containing all the protein, energy, minerals, and vitamins needed for optimum growth of the young heifer and development of the rumen.

TCR I and TCR II.  
Only from Agway.

## THOUGHT FOR THE WEEK

*Spend little effort  
and you will have  
little else to spend.*
