COST CUTTER

The cost of diesel fuel has jumped nearly 70 since October, 1973 and it's still about three cents a gallon cheaper than gasoline. Higher fuel costs call for a closer look at total operating costs when you buy engines. Deutz air cooled engines use 20 to 40% less fuel than most water-cooled diesel engines—far less than gasoline engines. And they are competitively priced. So hadn't you better buy or specify the cost cutter—Deutz? 10 to 500 bhp.
