**GOOD NEWS despite BAD NEWS**

The bad news is the prophecied famine, pestilences, and sorrow, serious drought in the west already. The good news is that the situation can be eased by live, spongy soil. Earthworms, bacteria, micro-organisms, trace minerals are very precious. Aiding nature, you get a lot of free help and plant food, spongy soil and subsoil that holds moisture, and long roots to go down and get it. Working against nature you need and pay for much fertilizer, plus insecticides, fungicides, and drugs for livestock.

Three products for sale to use with small amount of your fertilizer. \$2 to \$8 an acre will do much and save many other dollars. One promotes life, earthworms, bacteria, micro-organisms, good decay. One supplies the minerals and trace elements. One releases nutrients that are in the ground. It is also a wetting agent to mix in sprays, replacing half the chemical, is good for the soil instead of detrimental, and much cheaper than competitive products.

Write for free literature. Distributors wanted in other Counties. Eli L. Stoltzfus, 69 Strasburg Pike, Lancaster, Pa. 17602.
