

The high herd in the Berks County DHIA testing program for January belonged to Charles Plushanski. His 75 head of Holsteins pumped out an average of 1.98 pounds of butterfat per head. The individual butterfat leader for the month also came out of the Plushanski herd. "Fuzzy," a five-year-old, finished her 305-day lactation with 23,281 pounds of milk and 967 of butterfat. A cow named "Lisa" in Andrew Stoltzfus' herd checked in with the high lactation for milk — 25,457 pounds with 854 of butterfat.

New Cage Design Removes Board Scraping Problems in High Density Systems

SLANT BACK. This unique cage design eliminates dropping board scrapers and the work that comes with them. Vinyl shields deflect manure into the pit.

HIGH DENSITY. Increase bird population and cut building costs with Northco High Density/Slant Back Systems. A 38 ft wide house can easily handle four rows of triple deck 16 inch deep cages.

Northco High Density/Slant Back Systems are the functional way to make more from your investment. More profit. From more eggs. Produced by more birds. Only one thing comes up less . . . your labor.

Northco roof exhaust ventilation helps your system produce more. Fresh, clean air moves continuously through the house.

Find out more about Northco High Density Systems. Available with exclusive core-type auger feeding and patented automatic egg gathering.

When Power Fails depend on

PINCOR Electric Plants

16 KW 25 KW 50 KW

- Rated for continuous duty - 12 KW to 50 KW
- Tractor driven and automatic engine driven
- High motor starting capacities
- Slow speed - 1800 RPM operation
- Heavy duty construction
- Cool running triple chain drive transmission
- Rainproof construction
- Meets NEMA codes
- Completely wired control box
- Trailer and 3 point hitch options
