CATTLE 125. Compared with last Tuesday's market, slaughter cows strong to \$2 higher. One Choice slaughter steer at 37.25, Good 34.85-35.75, Standard 32.25-33.75, one Utility at 30.50. Good slaughter heifers 34.75-35.00, few Standard 28.85-30.00, few Utility 27.50-28.60. Utility & High Dressing Cutter slaughter cows 29.10-30.85, one at 31.00, Cutters 27.25-29.10, Canners 25.00-27.00, Shells down to 21.50. Couple Good slaughter bullocks 30.60 and 32.00, one Utility at 28.75.

CALVES 105. Vealers unevenly steady. Choice head, lot No. 1-3 125 lbs. 40.00 cwt.

SHEEP 18. Few lots Good & Choice 85-120 lbs. wooled slaughter lambs 44.50 and 46.00.

Home & garden show slated

The Lancaster Jaycees will hold its 22nd annual Home and Garden Show Tuesday, March 16 through Saturday, March 20 at the Guernsey Sales Pavilion, Lincoln Highway East. Hours for the show will be 6 to 10 P.M. weekdays and 1 to 10 P.M. on Saturday.

Doug Dennison of the Dallas Cowboys and Andrea McGilincy, Junior Miss of Lancaster will be on hand for

vealers 64.50-69.50, Good 55.50-59.00, Standard 42.50-48.00, Utility 110-125 lbs. 33.00-36.50, 85-100 lbs. 24.00-31.50. Farm calves, holstein bulls 90-120 lbs. 32.00-39.00.

HOGS 100. Barrows & Gilts mostly steady. US No. 1-2 200-235 lbs. barrows & gilts 48.00-48.25, No. 1-3 200-245 lbs. 47.25-47.85, lot No. 2-3 286 lbs. 45.85, lot No. 2-4 336 lbs. 40.00. Two US No. 1-3 sows 32.00 and 40.00.

FEEDER PIGS 21. US No. 1-3 25-35 lbs. feeder pigs 26.00-32.00 per head.

SHEEP 7. One Choice spring slaughter lamb at 67.00, few Good 57.00-58.00.

the ribbon-cutting ceremony on Tuesday night. Wednesday~Rick Volk of the Baltimore Colts will appear. Thursday is WIOV Night and there will also be a square dance demonstration. On Friday, members of the Lancaster Red Roses basketball team will be present. Saturday's events include a skydiving show and numerous craft demonstrations by Stauffer's of Kissel Hill. In addition, the show will feature a variety of exhibits ranging from Home Improvement, musical, garden, Security systems, food displays, handcrafted items to sewing and photography.

Admission is 50 cents with children under 12 free or complimentary tickets can be obtained from Lancaster Jaycees, exhibitors, and various merchandisers throughout the county.

AGRI-KING KEY TO PROFIT

WHY SILO-KING WORKS

ARNALDO BURGOS

Assistant Nutritionist and Field Consultant

Silo-King is a roughage preservative that contains a combination of refined enzymes, preservatives, antioxidants and other agents.

The antioxidants stabilize the simple sugars, vitamins and other nutrients. They prevent oxygen trapped in the silage from burning these nutrients which in turn causes the silage to heat and juice. The more severe the heating and/or juicing, the greater the loss of digestible protein, energy and other nutrients.

While the antioxidants are doing their work, the enzymes start breaking down simple (sugars and starches) and complex carbohydrates (fiber) creating a very rich environment for lactic acid producing bacteria to reproduce. This speeds up the silage fermentation process and results in bringing the acidity (PH) of the silage down to a desirable PH or 4 or below quite rapidly.

Because of the rapid action of the enzymes it is possible to create this rich environment for the bacteria. As a matter of fact, that is what enzymes do: accelerate the transformation of carbohydrates to lactic acid. Higher levels of lactic acid also represents a higher concentration of energy in the silage.

Only anaerobic bacteria (live without air) can produce lactic acid fast enough to reduce the PH of the silage in the shortest possible time.

Aerobic bacteria (lives only in the presence of air) utilize oxygen to burn carbohydrates and protein, transforming them into carbon dioxide, ammonia and water. This results in the production of high levels of butyric acid which causes silage to be rancid, have a loud unpleasant smell and be unpalatable. The water released contributes to silo juicing.

Why not add only anaerobic bacteria to the silage instead of enzymes? That would be like buying cows and having no feed for them. They would simply die. Why? Because you are filling the silo with material that has been exposed to air and more air is trapped in the silo at filling time regardless of the type of storage. Therefore, the predominant bug in the silo at first is aerobic bacteria.

Even if you add tons of lactic acid producing bacteria, they cannot work efficiently in the presence of air, so that become inactive until most of the oxygen is used up. By this time most of the damage has already been done with resulting loss of energy, digestible protein and other nutrients. Palatability is also reduced which can severely effect animal performance due to a lower feed intake.

Silo-King antioxidants and preservatives make it very difficult for the undesirable aerobic bug to find anything to eat, and you know what happens when you don't eat. At the same time enzymes are making food available for the good bug enabling him to reproduce rapidly, speed up the entire fermentation process resulting in the highest quality silage possible.

Only Silo-King contains this secret formula of refined enzymes (not crude enzyme by-products) preservatives and antioxidants.

You wouldn't think of planting corn without using a weed killer. Neither should you think of making silage without using Silo-King.

SPECIAL WINTER PRICE FOR SILO-KING ENDS MARCH 31.
