

# Cornwall Furnace tract may see expansion

HARRISBURG — Sen. Clarence F. Manbeck, R-48, sponsored a bill deeding a tract of land adjoining the historic Cornwall Furnace from Bethlehem Mines Corporation to the Pennsylvania Historical and Museum Commission.

The tract, almost three acres, includes three buildings that date back to the mid 1800s.

"Not only will the land be a useful addition to the Cornwall Furnace Historical site, but the buildings have historical and architectural significance to certain aspects of life on the iron-master's estate of which

Cornwall Furnace was a part," Manbeck said. "They can be used for meeting facilities and storage, both of which are needed at the site," Manbeck said.

Cornwall Furnace is the oldest fully preserved example of the early iron furnaces in Pennsylvania and prior to the development of the ore banks of the Lake Superior deposits, its ore banks were the most productive in the nation. It was an important source of cannon and shot for the Continental Army during the Revolutionary War.

The furnace was started in

1742 and continued in operation until 1883, and the State Historical and Museum Commission calls the mine from which ore was taken for the furnace "the oldest operated continuously in the New World. It has been mined for more than two centuries and is still the greatest iron ore deposit east of Lake Superior."

"I think Bethlehem Mines Corporation should be commended for deeding this property to the Historical and Museum Commission," Manbeck said. "It assures further preservation of this most important historical

# Horsemanship clinic slated

4-H horse project members and other 4-H members are invited to attend a horsemanship clinic to be held Saturday, March 13. According to Dr. C. M. Reitnour, extension equine specialist at the University of Delaware, the clinic will be held at Stamper's Arabian Farm, Cool Spring, Delaware. Cool Spring is

located near Lewes on Route 18, approximately six miles east of Georgetown, says Reitnour.

The clinic begins at 9:00 a.m., says Reitnour and will be held rain or shine because an indoor arena will be used. The Friday evening before the clinic will feature a lecture at 8:00. Lecturer and instructor for the clinic will be Ward Stuebaker, instructor of undergraduate horse science courses and horse herdsman at Penn State. Stuebaker has won numerous horsemanship honors nationally, according to Reitnour.

Each 4-H participant is asked to bring his horse or

pony as though he were exhibiting in a horsemanship class. Instruction on leads, change of speeds, changing gaits, contact with a bit, overall general horsemanship and judging will be offered.

Non-4-H members are invited to observe, says Reitnour. There will be a \$2.00 registration fee for participants, and \$1.00 fee for spectators. There will be refreshments available.

For more information, contact Dr. C. M. Reitnour at 738-2523 or call your county 4-H agent in Newark, Dover, or Georgetown.

### Freeway Wreck

One guy claims he's wrecked on the freeway every morning on the way to work. Remember a witless driver is one who has blown his mind. Since there's so many pumpkin-heads driving these days, it's like Halloween year-round on the nation's highways.

### Getting Caught

Most ironic crimes these days are getting caught at what everybody else is getting away with. It's like keeping a bank balance—or, walking a tightrope. Cigarette smoking isn't only dangerous to your health—it also destroys your pocketbook.

## ATTENTION DAIRYMEN

You can improve PALATABILITY, increase PRODUCTION and PROFIT by adding ALFA—ZYME to your dairy feed. It takes only 100 pounds of ALFA—ZYME added to a ton of feed to obtain these results. Since ALFA—ZYME costs about the same as 100 pounds of feed, it does not cost any more to feed ALFA—ZYME than if you do not feed it.

Lately, have you been reading or hearing about the importance of enzymes, lactic acids, yeast, in feeding rations? ALFA—ZYME is the result of growing these beneficial organisms. How? Through a natural fermentation process, these organisms, grow and multiply millions of times. They are added to the feed in a live and active state. No period of activation is required before they go to work, as in dry preparations. These very beneficial organisms keep the digestive system working at top efficiency at all times.

### WHO SELLS ALFA—ZYME IN YOUR AREA?

**ROSS H. ROHRER & SONS INC.**  
QUARRYVILLE, PA 17566

**GOOD'S FEED MILL**  
ELMER M. SHREINER  
RD1 NEW PROVIDENCE, PA 17560

### A NEW PROVEN TECHNOLOGY

- **Saves Energy** ... Costs as little as 3-4 ¢ per bushel.
- **Increases corn weights** ... Get up to 10% more grain by weight from your bin.
- **Preserves corn quality** ... controlled natural curing with GRAINLAMPS doesn't vaporize kernel ingredients, doesn't deteriorate starch quality. See GRAINLAMP dried corn and see the difference. Better than cribbed corn! Better feeding results.
- **Non-stop harvest.** The GRAINLAMP system eliminates batch-drying bottlenecks at harvest-time. Non-stop filling ... like a corn-crib. For the big producer and the small grower.
