

NEW IDEA'S FERTILIZER SPREADERS

For Orchards or Vineyards

Optional attachments to New Idea's twin-spinner spreader makes it ideal for use in orchards or in vineyards. A side spread attachment eliminates the center portion of the spread pattern for use in orchards. The curtain attachment, adjustable from five to six feet, limits the spread width in vineyards. Without attachments you can spread up to 30-feet wide, or spread just to one side or the other by shutting off one spinner. It's quick and easy for one man to attach or remove from most Category I and II 3-point hitch tractors.

Band Spread or Broadcast

The optional band spreading attachment fits quickly and easily over New Idea's twin-spinner units, and adjusts from 28-inches to 68-inches for side dressing a wide variety of row spacings. Without the attachment, you can broadcast up to 30-feet wide, or just to one side or the other. With other attachments you can spread to both sides with none in the middle (for orchards), or limit the spread to five or six feet (for vineyards). Easy to attach or remove from most Category I and II 3-point hitch tractors, New Idea's Twin-Spinner Spreader is ideal for pelleted, granular and semi-granular fertilizer and most seeds. Built-in tow plate pulls a harrow while spreading or trails a wagon of fertilizer to the field.

We make your job a little easier

ECONOMICAL SPREADING... up to 36 ft. wide!

New Idea's economical single spinner spreader-seeder does a fine job, fast and accurately. Its six adjustable steel blades on a single spinner give an effective spread width up to 36 feet. It has a 690 lbs (8.5 bu) hopper capacity, and is easy to mount on 3-point tractors. Can be cleaned easily, too. Come in and see it.
