AGROX® NOW AVAILABLE AT A REDUCED PRICE!

**Lifesaver
for seed**

AGROX® insecticide/fungicide seed treatment protects seed corn, soybeans, sorghum, beans and peas... against certain insect and disease problems your seed may face in the soil, especially in cold wet weather.

These problems include seed corn beetles, seed corn maggots, and fungus diseases that cause damping-off, seed decay and seedling blights.

AGROX 2-WAY protects germinating seeds and seedlings against them all. Due to new production economies, the price has now been reduced more than 15%.

AGROX 3-WAY gives you the same protection as 2-WAY plus control of wireworms. The price has been reduced 20%.

Both formulations are applied to seed

through the drill or planter box. No special equipment is needed. Simply mix 2 ounces of 2-WAY or 3 ounces of 3-WAY into each bushel of seed in the planter box. It's done in a few seconds. Seeding rate is not reduced because AGROX contains graphite.

AGROX protects seed against insects and provides extra protection against diseases, a dual advantage that's especially important now because of high priced seed and high replanting costs. See your dealer. Follow directions on the label.
