PUT WATER WHERE IT'S NEEDED

WATERMASTER 3

Moulded from polyethylene for ease of cleaning and maximum life. The Watermaster 3 has been designed for use by broilers, pullets, layers and turkeys from day-old onwards.

The special anti-perch shape prevents birds from fouling the drinker and in this, the big brother of the world renowned Watermaster 2, the 15 in diameter offers greater drinking space. The valve system is extremely simple to ensure continuous water supply. The large flat filter is easily removed for cleaning and all fittings are self-sealing with no 'O' rings or washers needed. Watermasters are supplied complete with the BEC saddle connector, 10ft. of tubing and suspension. The recommended stocking rate is 10 to 14 waterers per 1000 birds.

The specially designed protective ring for day-old birds is ideal for turkeys, breeding stock and rearing pullets. The water ballast gives excellent stability without making waterers too heavy to handle.
