

Dairy princess contest to highlight promotion week

The Lebanon County Dairy Princess Contest will be held June 12 at Boscov's in the Lebanon Valley Mall. The pageant will be the highlight of three days of dairy promotion.

Slated events include a milking contest to be staged on Wednesday, Thursday and Friday of that week with a petting zoo being provided for children. Several area 4-H Clubs and dairy businesses will be presenting exhibits also. The princess pageant itself will begin at 7:30 p.m. on Saturday evening with

entertainment being presented by the Singing Millers. Biographical sketches of the contestants follows:

Rosé Marie Brandt - The 18-year old daughter of Mr. and Mrs. Bernard Brandt, Fredericksburg R1, Rose Marie is a graduate of Northern Lebanon High School and is employed by the WAHT radio station as a sales representative. A 4-Her for 10 years, the youth grew up on a Holstein dairy farm and is an active member in the Boscov's Teen Club and

Kim Balsbaugh

the Mt. Zion Road Church of the Brethren.

Kim Balsbaugh - is the 18-year old daughter of Mr. and Mrs. Amos Balsbaugh, Jr. of Lebanon R1. A spring graduate of Cedar Crest High School, the young lady

Mary Sanger

was active in numerous sports including softball, hockey and the Pep Club. Kim is planning to attend Eastern Mennonite College majoring in nursing. The youth comes from a Holstein farm and was a 4-H member.

Carmelle Hernley

Linda Gross - the daughter of Mr. and Mrs. Howard Gross Myerstown R3, is 16-years old and will be a senior at Northern Lebanon High School. The young lady is considering a career in the medical field following her graduation next spring. Coming from a Holstein dairy farm, Linda enjoys canoeing and youth group activities.

Carmelle Hernley - is the 20-year old daughter of Mr. and Mrs. Delmas Hernley, Lebanon R3 and is a graduate of Northern Lebanon High School. She is attending Susquehanna University majoring in sociology and German. She is active in the Symphonic Band and is a member of St. John's Lutheran Church. The young lady comes from a Holstein Dairy farm also.

Mary Sanger - is the 17-year old daughter of Mr. and Mrs. Paul Sanger of

Rose Marie Brandt

Linda Gross

Fredericksburg R1. Mary owns six Ayrshire cows and one Jersey. She is a graduate of Northern Lebanon High School and has been an active member of 4-H, FFA and a school officer.

STAY ON TOP OF THINGS

WITH AN

ENSTROM

Get more things done around the farm - in less time - with your own reliable 3-place Enstrom helicopter. Spray insecticides; inspect crops; watch for erosion; check on cattle, pastures, fences, irrigation - quickly, efficiently.

Invaluable for hospital trips, getting over deep snow, floods, veterinary uses. Great for hunting, other recreation, prestige personal transportation.

Costs no more than many single-engine fixed-wing aircraft. Needs no airport - just a small clearing. Easy to learn to fly. For more information, contact Helicopter Manager at (302) 834-5400.

NEVER FORGET THE INDIVIDUAL PULLET OR HEN

"He can't see the forest for the trees". This old saying has been used to describe the problem of concentrating too much on individual items and neglecting the bigger picture. However, in poultry operations, just the opposite can happen. Flock averages are evaluated but often the performance, behavior and individual needs of each pullet or hen are forgotten. Yet, the individual bird is important in understanding the nutritional needs of the flock, in establishing standards of performance as well as developing certain management practices.

BIO-LAYENAS FEED INTAKE GUIDELINES¹

BIO LAYENA INTAKE GUIDES¹

FEED INTAKE GUIDE³
LBS./100 HENS/DAY

BIO LAYENA²

Bio Layena 100	Over 25 0
Bio Layena 107	23 4 to 25 0
Bio Layena 114	21 7 to 23 3
Bio Layena 121	20 0 to 21 6
Bio Layena 128	Under 20 0 lbs

¹The % shift from the graph line indicates normal variations for an age due to temperature.

²The numbers after the Bio-Layena rations indicate the Purina Bio-rating. Bio-Layena 100 is the base product. Each subsequent ration contains 7% extra amino acid, vitamin and mineral fortification over the previous one. For example, Bio-Layena 114 contains 7% more fortification than Bio-Layena 107 and 14% more than Bio-Layena 100.

³Values are guides only since feed use varies due to wastage, strains, etc. Use local judgment as when to change rations. Generally intakes for pre-peak layers are not a good guide to ration choice since non-layers [immature pullets] distort average values. However, after 27 to 28 weeks they can be used to match the correct Bio-Layena ration to the hen's needs.
