

Wayne **BROOD 'N IRON** the 400-lb. iron shot

By starting to feed your sows new Wayne Brood 'N Iron 30 days before farrowing, and continuing it for two weeks afterward, you can give baby pigs all the iron they need without giving them the needle. Sows give their unborn pigs iron-rich blood, and after birth, pigs get extra iron from the sow's milk every time they hit the nipple.

This dramatic new product is available in Wayne Brood 'N Breed, a 15% protein complete feed containing Brood 'N Iron, and Brood Sow Supplement B.I. a 36%

protein supplement containing Brood 'N Iron.

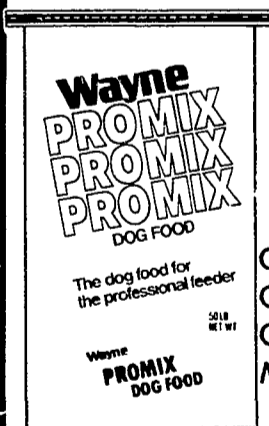

Research tests on Brood 'N Iron show how you can gain:

- Consistently high hemoglobin levels in baby pigs, even without iron injections.
- Two-tenths of a pound heavier birth weights
- An increase in liver storage of iron in baby pigs at birth
- Iron levels in the blood plasma are increased in both sows and pigs
- Sow's milk has increased iron content.

Let your baby pigs prove the effectiveness of Brood 'N Iron. Ask your Wayne Feeds dealer about Brood 'N Breed and Brood Sow Supplement B.I. today.

WAYNE PRO-MIX
