# Cheese imports down

WASHINGTON, D.C. - The U.S. Department of Agriculture reported that imports of cheese licensed under Section 22 quotas of the Agricultural Adjustment Act, as amended, declined during 1975 for the second year in a row.

The Department's annual report on imports of cheese and other dairy products showed use of licenses issued against the quotas for cheese amounted to 70 per cent of the total allocation, compared to 75 per cent in 1974 and 87 per cent in 1973.

The purpose of the quotas is to prevent imports from materially interfering with the U.S. dairy support program.

Lower quota utilization was due primarily to the unstable price situation

resulting from general inflationary pressures and to counter-vailing duty actions affecting important supplying countries. These actions, directed against foreign subsidies, have resulted in the removal or substantial reduction of subsidies on exports to the United States for most industrial cheeses as well as other cheeses used for further processing, such as Swiss cheese.

High prices held imports of the "pricebreak" cheeses (Swiss or Emmenthaler; Gruyere-process cheeses; and the basket category of Other cheeses) to an average utilization of only 61 per cent the quotas. For these categories, when the f.o.b. price exceeds the "pricebreak" level, quotas do not apply and import licenses are not required. Although price rises may in some cases merely have shifted transactions from quota to nonquota status, the total volume of "pricebreak" cheese imports (quota and nonquota combined) decreased substantially.

Imports under other cheese quotas also reflected the price and demand situation. Imports of processed Edam and Gouda cheeses, a traditional low-use quota item, were only 23 per cent of the quota due to short supplies, high prices and lack of demand. By contrast, each of the quotas for Italian-type cheese and for Blue-mold cheese were 86 per cent utilized, and 94 per cent of the Edam and Gouda quota was used.

As usual, utilization of the comparatively small quotas for Cheddar and for American-type cheeses other than Cheddar was near the quota limits - 95 and 98 per cent, respectively.
