for a New England tour to the nation's most historic sites just when New England has its best weather and its special bicentennial activities and it gives industry men from the northeastern area an "at home" exposition.

"We're as pleased as we can be with the site, the facilities, the cooperation of Springfield officials and the fact that this Convention will be an easy day's drive for poultrymen from any of the 14 northeastern states covered by NEPPCO and NEMA," says Ammon.

The big annual exposition will be staged in the 40,000 square foot exhibit area of the new, fully air conditioned \$10-million Springfield Civic Center. The adjacent Springfield Marriott in Baystate West and the

Holiday Inn will be used to accommodate attendees.

Dozens of special bicentennial events are being staged throughout New England during the weeks just before and after the exposition. Ammon expects scores of industry men to combine a family vacation tour with the three-day show and recommends early registration. Hotel and motel accommodations will be handled by the Springfield Convention and Visitors Bureau.

Teamed with the large commercial exposition will be full-scale educational sessions, complete programs for youth and women and several special social and business activities.

WASHINGTON, D.C. - Three members of the Eastern Lebanon County FFA Chapter, and two from the Little Dutchman Chapter, attended the National FFA Bicentennial Conference, here, recently. The three from ELCO were Kirby Horst, Robert Martin, and Patrick Arnold. Little Dutchmen in attendance were Jay Bomgardner and Alan Hostetter.

The FFA Conference program was designed to improve leadership skills, develop an understanding of the national heritage, and prepare FFA members for more effective leadership roles in their chapter and community. The Conference was also a forum for the exchange of FFA Chapter activity ideas among members from across the nation.

Besides the training sessions, the 1976 program included visits to Mt. Vernon Plantation, the National Archives, Smithsonian Institution, Arlington National Cemetery, and several other historic monuments and memorials in and around the Capital.

A highlight of the Conference was a Thursday morning visit to the offices of their congressmen. Later participants attended a Capitol Hill luncheon featuring a question and answer period with congressmen, and Washington leaders in business and industry.

Farm mechanization is reflected in trends toward increasing farm fuel use, which is expected to increase about four percent by 1980.

**CORN SILAGE**

The TDN available in the feed produced from forty acres of corn put up as silage is far greater than the TDN in yellow corn from that same acreage. The increased TDN, according to U.S.D.A. figures can mean 230,000 additional pounds of milk when it is fed to dairy cows. This represents a potential revenue gain for the dairy farmer.

THE SAME 40 ACRES WILL PROVIDE TDN FOR AN ADDITIONAL 230,400 LBS. OF MILK ... AT 8¢ LB. THIS EQUALS \$18,432.00.

BULLETIN 578 U.S.D.A.

WITH **NO** FERMENTATION CONTROL

MILKING COWS ..	41
DRY COWS .....	8
HEIFERS .....	13

<b>TOTAL:</b>	<b>77</b> PER 100 ACRES

TRIPLE S LAB

Studies have shown that more dairy cows can be fed from the same acreage when our fermentation products are added to the silage. When regular silage from 100 acres feeds 62 dairy cows, fermentation controlled silage has been found to feed 77.
