# Fair's parade route traced

**QUARRYVILLE** - The annual parade, a main attraction at the fair, here, takes place Friday at 6:00 p.m. The parade is to assemble just east of the Lancaster Bone and Fertilizer Company on the Fair parking grounds. Parade participants will be entering from South Lime Street since Park Avenue and Hess Street will be blocked for the

formation of the parade. The parade will leave the Park grounds and move north along Hess Street. It will then turn left on to Fourth Street and move west to the intersection where Routes 222 and 372 come together (West State Street). Proceeding eastward along State Street, the parade will pass by the judges stand, which is

located in the vicinity of Church Street. The parade will move along to South Lime Street and turn off to the Fairgrounds at Park Avenue. The first prize float in 4-H, FFA, or FHA receives \$20.00 while second place finishers receive \$10.00. Other youth entries from the Solanco area receive \$5.00. A total sum of \$350.00 more will be

divided among all parade winners except those mentioned above. One of the most fragrant spices blended in incense, cinnamon was burned at the funeral of Poppaea, Nero's second wife. The city of Rome had to relinquish its entire annual supply for the show of grief.

**NEW MODEL 70's Zero Concord TWIN-VACUUM PIPELINE MILKING SYSTEM - WITH COW MONITOR**

The ZERO CONCORD is a combination of a revolutionary pipeline milking machine and the ZERO Completely-Automated Vacuum Bulk Milk Cooler. It's the only system that provides stable milking vacuum at the teat end—in parlor or stanchion barn—with a low or high, short or long, pipeline—and without injecting air into the milker units to move the milk. Only with stable vacuum and no air injection can you hope to reduce leucocyte counts up to 65%—increase milk production as much as 20%—and prevent off-flavor milk.

A patented, scientific principle... TWIN-VACUUM whereby one vacuum milks the cows—and a different vacuum moves the milk through a separate pipeline into the bulk tank—is what makes safe, stable vacuum possible. Furthermore, ZERO's patented SPATTER-SI RAY Automatic Washer—and a new, improved, more-compact, high-capacity, transparent milker unit—provide built-in, "push-button", visible self-cleaning and sanitizing of the entire system—without disassembling. And there are many other superior features.
