designed apparatus allows a serviceman to split the tractor in several places with minimum effort, and in comparatively short periods of time.

The "control center," as IH insists their cabs be called, was moved 18 inches forward to give the operator

a better view and a more comfortable ride. These features in themselves gave the men with the red hats and jackets a lot to blow their own horn about and they're convinced it will put them in a more competitive position than they've enjoyed in recent years.

AGWAY

The only corn crib you'll ever have to buy!

Behlen lifetime corn crib

You'll never have to replace this crib because it's made to last a lifetime. Hot-dip galvanized with no exposed weld spots to gather rust! Your Behlen crib will stay perfectly in round throughout its lifetime. Horizontal bolt hookups and heavy 4-gauge bar-mesh steel panels resist strong winds, empty or full.

And the Behlen corn crib can be erected in just one day. A Behlen is your answer to storage from 697 to 1684 bushels.

Field demonstrations were a part of the show at International Harvester's research facilities near

Chicago. Here the new series "86" tractors were hitched to a variety of tillage and forage equipment.

Lancaster Farming Photo by Dieter Krieg

"The Age of Agrarius" was recently ushered into existence during the presentation of International Harvester's new line of equipment. Leading the list of the company's new series "86" tractors is this

model 4586. The pre-view, which came 10 days prior to the lifting of the tarps at dealerships across the country, was held at McCormick Place in Chicago.

The more acreage you have, the more you need this giant harvester.
