Juan Manuel Fernandez, visiting dignitary from Venezuela, was escorted to the Solanco Fair by Jay Irwin, (left), county agent, and Mike

Lynch, (right) coordinator of staff development for Penn State's extension staff.

# Cindy

Continued from Page 15]

Cindy is a 1975 graduate of Kennard-Dale High School and vied for the York County dairy princess title last year. In addition, she was named captain and outstanding volleyball player of her high school's team, was the prom queen, has held just about every office in the York County 4-H organization.

Having shown her prized Holsteins at every level, including the Nationals, Cindy might have an idea as to what to look for in a cow. According to her, it's the "big, upstanding, powerful cow, displaying a lot of dairy character and having a beautifully attached udder" which makes the grade. Furthermore, the animal should stand on a good set of feet and legs.

Not all of the Airville 4-Hers moments have been illustrious and happy. Her first 4-H project, for example, turned out to be a grand champion, and as is the case with all her animals, she fell in love with it. This one, she remembered was her favorite. The experience came to an unhappy ending when, at age 8, her cow wouldn't breed. Weighing 1950 pounds, Cindy reluctantly agreed to part with her.

Most of Cindy's experiences and recollections are happy and memorable, however, and she has an optimistic outlook for the dairy industry as a whole.

The dairy industry will always have a good place in this world because milk is Nature's most nearly perfect food, she agreed.

downfall, and by Thursday morning it was pouring.

Regardless of the inclement weather, the day's agricultural events went on as planned. The cattle tents became the show rings for the colored breed judging and the evening baby beef show.

The show to suffer the most from the drenching was the swine show. That particular tent was situated in a gully and the runoff from the higher elevated areas created a steady stream through the middle of the tent.

But, by evening the rain had slackened off enough for a large crowd to gather for the exhibition of the 4-H and FFA Baby beef show.

On Friday, the rescheduled baby parade went on "rain or shine."

## ANTI-POLLUTION PRODUCTS

ORGANIC FERTILIZER is coming into prominence fast because of necessity. Without it there is too many bugs, blights, soil compaction and bad effects of poisonous sprays in the consumer including your livestock. Organic farmers with many older and newer products have more nutritious crops at less overall cost.

A natural mineral with enzymes and amino acids, mined in Oregon is both a terrific soil balancer and excellent livestock feed. A very little manure or nitrogen with it works wonders for big healthy crops. Great for healthy livestock and poultry-cage fatigue, mortality, vent picking, (no debeaking needed) swine diseases (no medication needed), afterbirth retention, etc. Saves about 15 percent to 30 percent on feed consumption, no kidding.

A new stabilized enzyme sprayed on the soil greatly and quickly improves poor soil, clay and wet soggy soils which bake later. Dries up swamps, yet makes soil hold moisture; a miracle but so is nature. Dealers wanted for above products.

Electronic seed treatment is also a crop improver, especially roots, protein, feed value. Done at Edgar M. Martin's farm near New Holland. Phone 717-354-9917 for appointment.

Lactobase and Agriserum are excellent and proves seed treatments for big roots, more nutrition and protein in crops, soil improvement. Multiply precious soil life and earthworms fast at very little cost.

With only Lactobase and Agriserum and trace minerals as fertilizer for 5 years, I got from 10 acres, over 600 bushels Triticale, a cross between wheat and rye. I cleaned it and sell for \$6.00 a bushel. A vigorous grower, tall straw and extra high protein for livestock feed.

Organic produce companies are co-operating for a large Organic produce buying center possibly in New Holland next year. To qualify, keep the chemicals off the land and the children on the land where they belong and not take away jobs from town people. You can raise high quality with my products especially if applied earlier than planting time.
