

**New Idea's Long-Reach Elevators**

**REACH!** Get extra reach and save money with this multi-purpose elevator!

Take our word for it, this New Idea elevator will do the same job that longer (and more expensive) elevators do. The way they've engineered and balanced the extra overhang beyond the wheels makes the important difference. It raises and lowers quickly with a new, safer, easier-to-operate hand winch. The deeply embossed areas around bolt holes and steel angles that overlap joints give it rigid, no-sag construction and extra long life. Additional strength is provided by formed stress plates welded to the bottom of each section. Five lengths—31 to 51 feet. Choice of hoppers and drive. Written full year guarantee.

**New Idea's Auger Elevators**

**Makes short work out of long reach jobs!**

Get top quality in a balanced auger that has a unitized center drive section, fewer working parts and less maintenance. Easy to move, easy for one man to set up and operate.

Make short work of those long-reach jobs with capacity up to 2,600 bushels per hour. Choose 6" or 8" diameter auger; gasoline, electric or PTO drive; gravity or tilt hopper.

Pick the length for your operation . . . 35 to 60 feet, in wide, stable tread with heavy duty scissors design truck. Its relatively low cost is a real smilemaker!

*We make your job a little easier.*

**New Idea's Forage Boxes**

**Two rugged boxes built to last.**

New Idea's two big forage boxes—the 14-ft. and the 16-ft.—are both built to get the job done fast. Both are available with 2 or 3 beaters, and galvanized roof. The 16" diameter beaters have staggered teeth, to give a waterfall effect, delivering a more uniform feed to the cross auger. The 16" diameter cross auger means you get smooth, positive unloading without chains, slats, bearings, or idlers. In all, these attractively priced boxes are built to bring your crops in—fast.

**New Idea's Forage Blowers**

**Gives you a quick lift**

Blows silage, haylage, or grain to the top of the highest silos at the rate of up to 100 tons an hour. Six big 54-inch fan blades discharge the material at a speed of more than 125 feet per second! That's why we say it'll give you a quick lift.

It has New Idea Quality throughout. Easy to transport. Easy to set up, position and use. Matching the hopper height to the forage box is simple. And, rugged heavy-duty construction keeps this forage blower on the job years longer.

Can we give you a quick lift? Ask us for more information.
