## Tobacco compared to milk

ROSEMONT, Scientists at the university of Maryland are extracting high-grade protein from tobacco leaves, according to material can be recona news dispatch from the stituted for smoking or on the food industry as well. Washington Post that circulated to other papers across the nation on Oct. 12. "It's as good for you as milk," Dr. Martin Schwartz, the university's Dean of Science, was quoted as saying. Called Fraction-1-Protein, the tiny, white protein crystals from the tobacco are tasteless and odorless, "stable, easy to store and (are) soconstructed that (they) can be manufactured in a gel-like form that looks much like soybean curd, a staple food in many countries.

Fraction-1-Protein, as it occurs in raw tobacco, would be hazardous if smoked. "When you burn it, it gives off products like cyanide and nitrogen that are not good for you," said Dr. T.C. Tso of USDA's Beltsville Research Center in the article. But as a product to eat, Dr. Tso said: 'Its nutritional value is comparable to milk and surpasses that of soybeans."

The protein exists in all green plants but can only be extracted easily from tobacco. However, normal methods of tobacco curing destroy the protein. Thus, Dr. Tso has been working on a process known as "Homogenized Leaf Curing." In this process the and suspended in a liquid hung up to dry to cure.

from sugar cane and sugar chewing tobacco, one wonders if this development beets.

Since the remaining

may drastically change the economics of the tobacco industry, and have an effect

## Safer spraying taught

UNIVERSITY PARK, Pa. Over six thousand Pennsylvanians have been cer- · such areas as fruit growing; tified to use restricted-use pesticides through a correspondence course developed by Penn State's College of Agriculture. It is estimated by Dr. Fred C. Snyder, -director of correspondence courses at the University, that over 25,000 pesticide applicators in the state remain to be certified. The certification deadline is October 1977.

The course, Pest Management and En-vironmental Quality, is designed to assist in-dividuals in preparing for certification as private or commercial applicators of pesticides. It provides basic information on management of common insects or mites, weed control and herbicides, plant disease control, pesticide labeling, safety, etc.

Examinations for Pennsylvanians are administered through the State Department of Agriculture who estimate that only .031 per cent of those taking the exam have failed, attesting to the thoroughness of information

includes the correspondence course and category packets, covering plant, animal and aquatic pest control; forest pest control; public health pests; seed treatment; etc.

To order a copy of the write Pest course, Management, Box 5000, University Park, Pa. 16802. Make-your check for \$6.00 payable to Penn State. An application blank for education material packets is also available by writing to the same address.
